

2024 NSW and ACT Additional GPT1 to GPT4 AGPT Registrar Webinar Series

In 2024 RACGP will offer an optional additional educational evening webinar program for NSW and ACT AGPT GPT1-GPT4 registrars.

Registrars can attend these webinars in their own time as attendance for these evening webinars is optional and is not included in the total number of educational hours recorded in the training management system (TMS).

Content for the optional evening webinar series is varied and registrars can choose which webinars they wish to attend depending on their educational needs and stage of training. Some sessions (eg planning your learning) are more catered towards registrars early in their training, for example during a GPT1 or GPT2 term.

Registrars are encouraged to attend as many sessions as possible as they will assist their progression in training towards independent clinical practice and attaining their Fellowship.

Registrars can self-register for each webinar from the link provided in the far-right column in the table below.

Once registered, registrars will then access a more comprehensive abstract and set of learning objectives for the specific session.

Please note: the evening webinars commence at 7:30pm and run for one hour with the exception of the Cultural Awareness Training webinars, which commence earlier, starting at 7pm and conclude at 8:30pm.

I hope you find this optional additional educational evening webinar series a useful adjunct to your learning and training.

Dr Anna Sallos

Senior Regional Medical Educator - Registrar Education Lead

Topic	Date	Presenters	Brief Abstract	Registration Link
Effective Study Skills	20 Feb 7:30-8:30pm	Chris Starling and Simon Morgan	This webinar provides an overview of effective study strategies and how they can be utilised during general practice training, both for exam preparation as well as for a lifelong learning.	Register Now
