Point-of-care ultrasound is an increasingly affordable and efficient diagnostic tool in general practice, particularly in areas with limited access to specialist services.

Why attend

The full-day CPD Accredited Activity will increase your understanding of the applications of point-of-care ultrasound in the diagnostic process.

Experts will guide you through the diverse applications of point-of-care ultrasound in primary care services using advanced, high-end mobile ultrasound equipment provided by our sponsor, Sonosite.

Participants will rotate through five ultrasound skills stations:

- eFast
- deep venous thrombosis
- intravenous line finding/placement
- musculoskeletal soft tissue
- first trimester transabdominal obstetric ultrasound.

This event is capped at 25 participants to allow increased hands-on experience.

Supporting rural GP attendance

*Thanks to the generosity of the 'Dr Bruce Roberts Bequest', RACGP members living or working in a Queensland [MM 3–7 area](#) will have their registration cost fully funded. Contact qld.events@racgp.org.au to register under the bequest. Limited bequest spots available.

The workshop is also approved for all categories of the Rural Procedural Grants Program.
