RACGP Queensland is holding a series of cardiopulmonary resuscitation (CPR) workshops to fulfil your CPR requirements for the 2017-19 triennium.

Program

This workshop will cover:

- DRSABCD Action Plan
- Management of the breathing, unresponsive casualty
- Management of the non-breathing, unresponsive casualty
- Resuscitation of an adult, child and infant
- Introduction to the use of a defibrillator.

These two-hour workshops, facilitated by BLS First Aid, will incorporate HLTDAID001 'Provide Cardiopulmonary Resuscitation' in accordance with the 2016 ARC Guidelines. To maintain quality of education, attendance numbers for each workshop are limited. Please register early to avoid disappointment.

Please note, to complete assessment of CPR you must be physically able to perform two minutes of continuous CPR on the floor. If you are unable to do so due to physical limitations, please contact us to discuss your options to meet your CPR requirement.
