Approved alternative model to be evaluated

Title of alternative model:

Training standard(s) to which the alternative model applies:

Supervision/educational objectives of alternative model:

Outcomes of the approved alternative model

For alternative models of supervision only

Safety and high-risk situations

How has the supervision model worked to provide the supervision required to ensure patient and GP in training (GPiT) safety?

Was the GPiT exposed to any high risk or emergency clinical events and if so, how did the approved model play out?

How was cultural safety achieved?

Please include specific examples of how the supervisory structures put in place did or did not achieve patient and GPiT safety. If the supervisory structure posed safety concerns, how can it be modified to ensure safety is achieved?

For all alternative models of training

To what degree were the intended educational outcomes achieved by the alternative model of training?

Please refer to the educational outcomes detailed in the initial application.

Were the processes and procedures of the alternative model followed as detailed in the original plan? Please detail any modification made to the original process.

Please provide details of feedback on the educational outcomes and the process by the GPITs, supervisors, training site staff and educators involved.

Training organisation assessment of the approved alternative model of training

If this alternative model of training is to continue, what, if any, changes need to be made?

Is this alternative model of training applicable to other training contexts? If so, do you recommend any modifications to make it applicable more broadly?

Declaration

The training organisation agrees that any repeatable, RACGP-approved model may be de-identified and published for use by others.
