## Are you looking for education and support on your pathway to Fellowship?

### **The RACGP's Practice Experience Program (PEP) could be for you.**

The self-directed education and support program has been designed specifically for non-vocationally registered (non-VR) doctors in Australia to prepare you for the RACGP Fellowship exams and develop your career in Australian general practice.

With access to a broad suite of online learning units, support from experienced medical educators and a structured optional exam preparation course, you can draw from, and expand on, your ongoing experience, building valuable knowledge and skills for the journey towards Fellowship, all while accessing full A1 Medicare rebates.

You'll also be a step ahead when eligibility for Fellowship exams changes at the end of 2021. From this point on, non-VR doctors will have to successfully complete the PEP to be able to sit exams.

**Apply now and advance your career in regional, remote or rural Australia.**

Places are limited.

# Unlock the benefits of the PEP

## The flexible education and support program that Australia's non-VR doctors need

### ✓ A tailored program

You have a wealth of medical knowledge, so work with our team to tailor a learning plan that acknowledges your experience and identifies your areas of interest.

- Select from up to 40 different online learning units and complete workplace-based assessments.

### ✓ Exam preparation

Further to the education and support you receive as a PEP participant, you can now also prepare for Fellowship exams with the optional Practice Experience Program Exam Preparation (PEPEXP) course.

- Develop your clinical reasoning skills and access previous exam material from the RACGP exam question bank, with the support and guidance of RACGP medical educators and examiners.

### ✓ Your own support network

You don't have to tackle this alone. Be mentored by GP medical educators from a training organisation, and meet like-minded colleagues through the RACGP's National Faculty for GPs in Training.

- Benefit from the support, guidance and educational advice of an experienced medical educator, and obtain valuable feedback from a clinical assessor during regular workplace-based assessments.

### ✓ A1 Medicare rebates

Are you maximising your earning potential? Access full A1 Medicare rebates while participating in the PEP.

- Be entitled to the same benefits as specialist GPs, with access to a PEP provider number while you participate in the program and build your exam eligibility during your post-educational PEP component.

### ✓ Professional confidence

Enhance your confidence in general practice as you work your way towards Fellowship.

- Access a range of online learning resources and receive crucial feedback and support to help enhance your skills in Australian general practice.

### ✓ Best practice

Regional Australia needs doctors like you. The PEP empowers you to provide the highest quality of care, where it's needed most.

- Expand your capabilities to make an even greater difference in communities across regional, rural and remote Australia.

## Be prepared for Fellowship

The rules for exam eligibility are changing at the end of 2021. If you're a non-VR doctor wanting to become a specialist GP and receive Fellowship of the RACGP, you'll need to have successfully completed the PEP to be able to sit Fellowship exams from January 2022 onwards.

**Don't miss out — places are limited.**
