

Date Participant name

Assessor name Practice Details

## Case details

Patient Information: Age Male Female

Patient problem(s)

Consultation type: New to the participant Follow up

## Case complexity

High Medium Low

### Agreed focus area(s) of the clinical encounter.

Communication	Consultation skills	History	Physical examination	Investigations
Management	Professionalism	Partnering with the patient	General practice systems	

## Rating and feedback

Not all competencies are rated on every occasion, focus only on the relevant sections for this assessment.

Select the option that best represents the participant's performance using the Rubric as a guide.

You can also use these to provide narrative anchors for what you have observed and add these into the comments as appropriate.

The standard is set at the level of Fellowship. Overall clinical competence should be rated as being at the standard expected at the point of Fellowship and would require that the participant performs consistently at that standard across all the domains.

Your feedback is important so please provide comments. Be specific and precise with a focus on what is actionable.

Please continue on the next page.

## Rating and feedback

Competencies	Significant margin for improvement	Progressing towards the standard expected			At the standard expected	Not rated
		Occasionally performs at this level	Consistently performing at this level	Sometimes performs at the next level but is not yet consistent		
	Significant concerns				Consistently performing at this level	Not the focus of this assessment/ not observed/ insufficient evidence to assess
