Introduction

This is a discussion paper to describe how the Royal Australian College of General Practitioners (RACGP) profession-led community-based training (PLT) education program will be organised and delivered. By education we mean the process of developing knowledge, skills and attitudes including learning, teaching, training, and assessment. This paper is a dynamic document that will evolve and be refined as we engage with internal and external stakeholders in the design of the PLT education program. Our goal is to use a best-practice and consultative approach to build on what is working well in the current vocational training programs to create a national general practitioner (GP) training program that will serve the Australian community and the profession into the future. It is based on the vision outlined in the [RACGP profession-led community-based training](#) document (fig 1), and aligns with the RACGP educational framework and standards for general practice training. The model is shaped by contemporary social imperatives and our obligations as an accredited specialist medical college with the Australian Medical Council (AMC).

Key priorities frame this document and the design of PLT to support high quality education and training outcomes:

- We aim to optimise the training experience for GP registrars to ensure safe, independent, self-reflective GPs who are committed to life-long learning and care for their communities and for themselves.
- We prioritise Aboriginal and Torres Strait Islander health needs and aim to increase the number of Aboriginal and Torres Strait Islander GP Fellows.
- We include innovative approaches to recruit and retain GP registrars in areas of workforce need, particularly in rural and remote Australia. Rural generalist training is a key component of PLT.
- We prioritise collaboration with the Australian College of Rural and Remote Medicine (ACRRM) as they build their training model. Collaboration will ensure effective design and delivery of PLT; enable efficient development and use of resources; and provide a streamlined process to accredit training sites, place registrars, and provide professional development for supervisors.

The objectives of this paper are to:

- describe the organisation and delivery of vocational GP education and training under PLT
- provide the basis for engaging internal and external stakeholders in refining the PLT operating model
- inform the design of the educational program day one operating model for each training region from January 2023
- guide transition planning with each Regional Training Organisation (RTO)
- align PLT with the RACGP standards for general practice training
- ensure RACGP training accreditation with the AMC is maintained
- orientate other PLT transition projects including:
 - syllabus development
 - educational policy framework
 - IT systems
 - resourcing models.

We intend for PLT to make a significant contribution to the well-trained and equitably distributed GP workforce, which is essential for meeting Australia's national health goals. We aim to optimise the training experience for GP registrars.

PLT outcomes include:

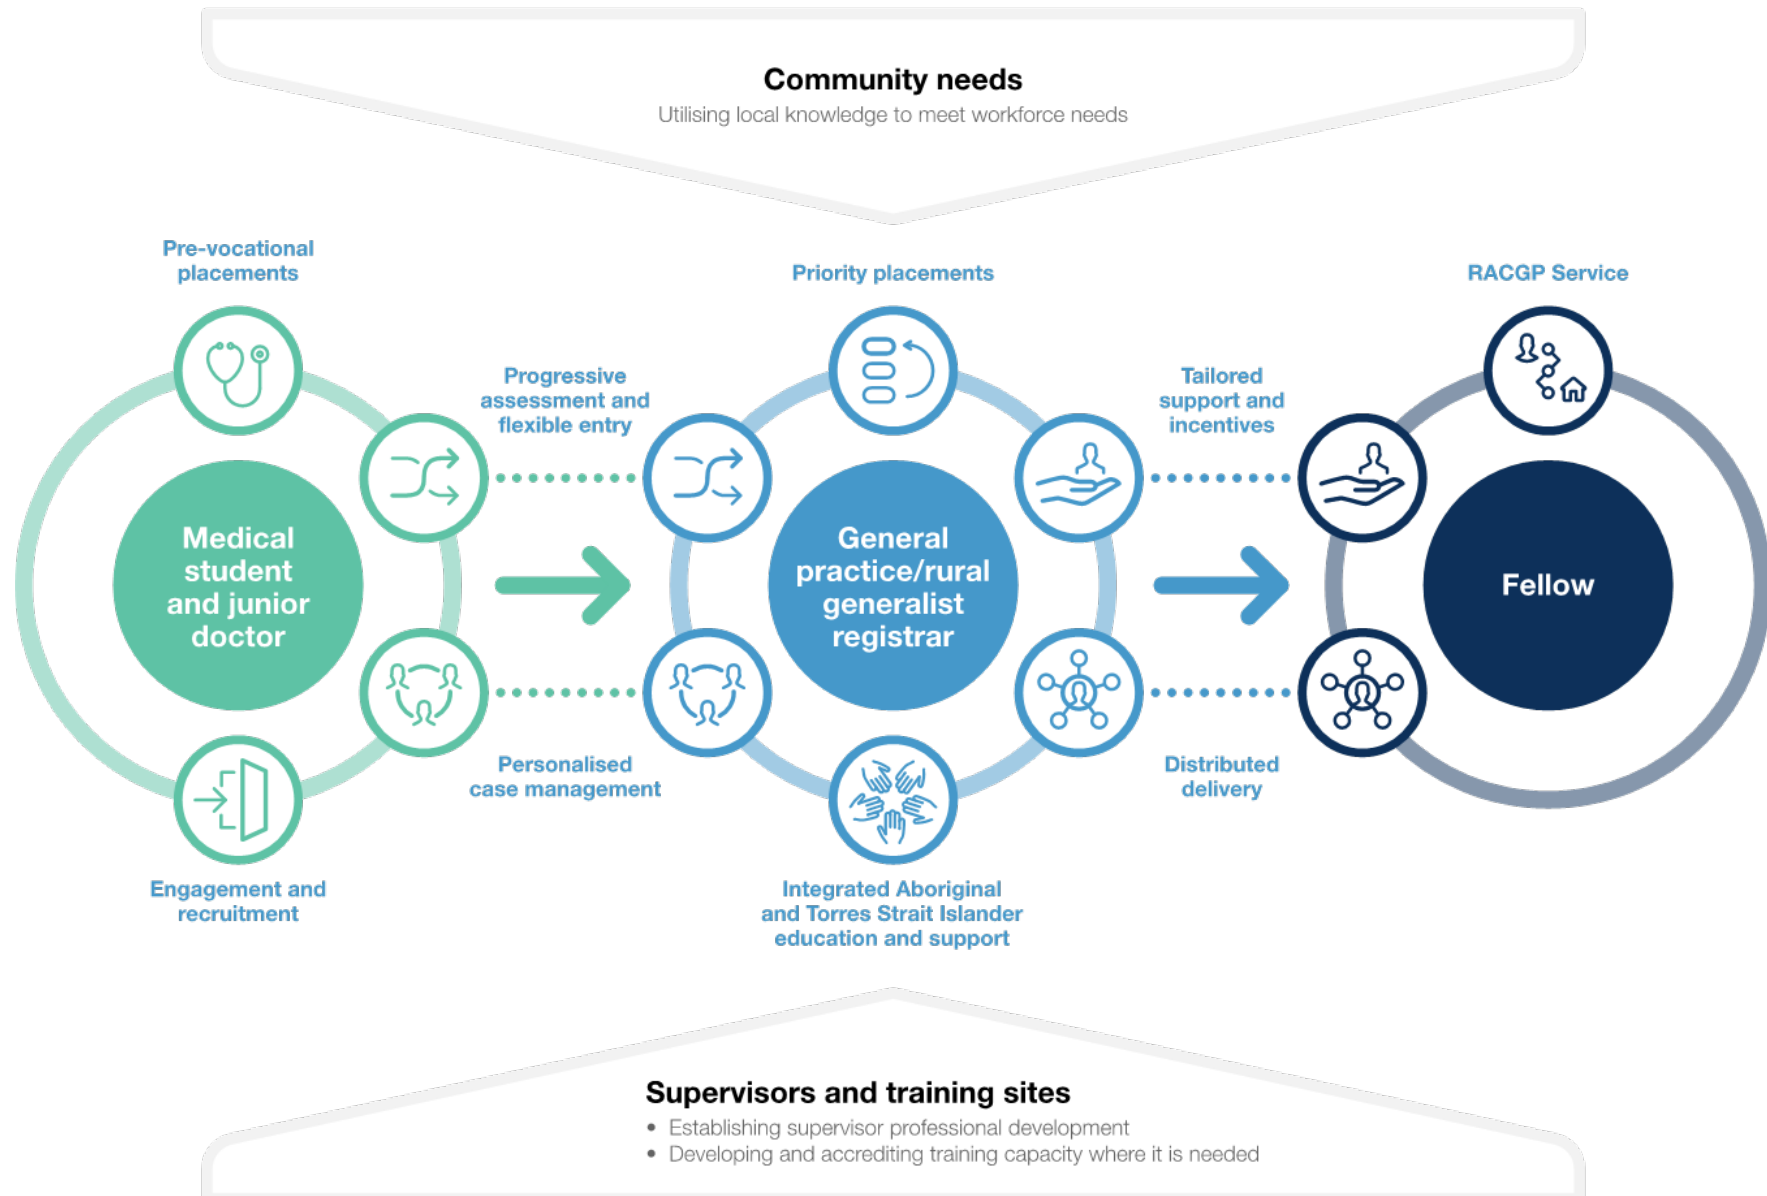

- a well-trained general practice workforce aligned with community needs
- a quality GP training experience
- helping to close the gap in health equity for Aboriginal and Torres Strait Islander peoples
- community and registrar safety
- effective and efficient use of funds
- general practice as a profession of choice.

The PLT model emphasises local relationships and work-based learning with the benefits of a coherent national approach. It addresses issues of workforce distribution by building training capacity in areas of workforce need and creating training pipelines into these areas. These training pipelines involve fostering and enabling interest in training in an area of workforce need through an individualised case management approach. PLT then invests in ensuring excellence in training for registrars placed in these areas of workforce need. PLT prioritise in-practice training with site-specific support and out-of-practice education to enhance in-practice learning. In-practice support focuses on the supervisory team, which is key for registrar training. A robust remote supervision model will support training in more remote locations. Aboriginal and Torres Strait Islander cultural and health training is both addressed specifically and embedded throughout training. PLT endeavours to move towards an outcomes-based approach and this is supported by a progressive assessment program. PLT will also take a structured approach to training in academic general practice to build academic capacity across the profession. Centralisation of generic training functions and online resources will provide efficiencies.

Based on this document, RACGP will also produce:

- a description of the PLT program with operating detail
- a day one operating model with resourcing detail.

Figure 1: RACGP Profession-led community-based training vision

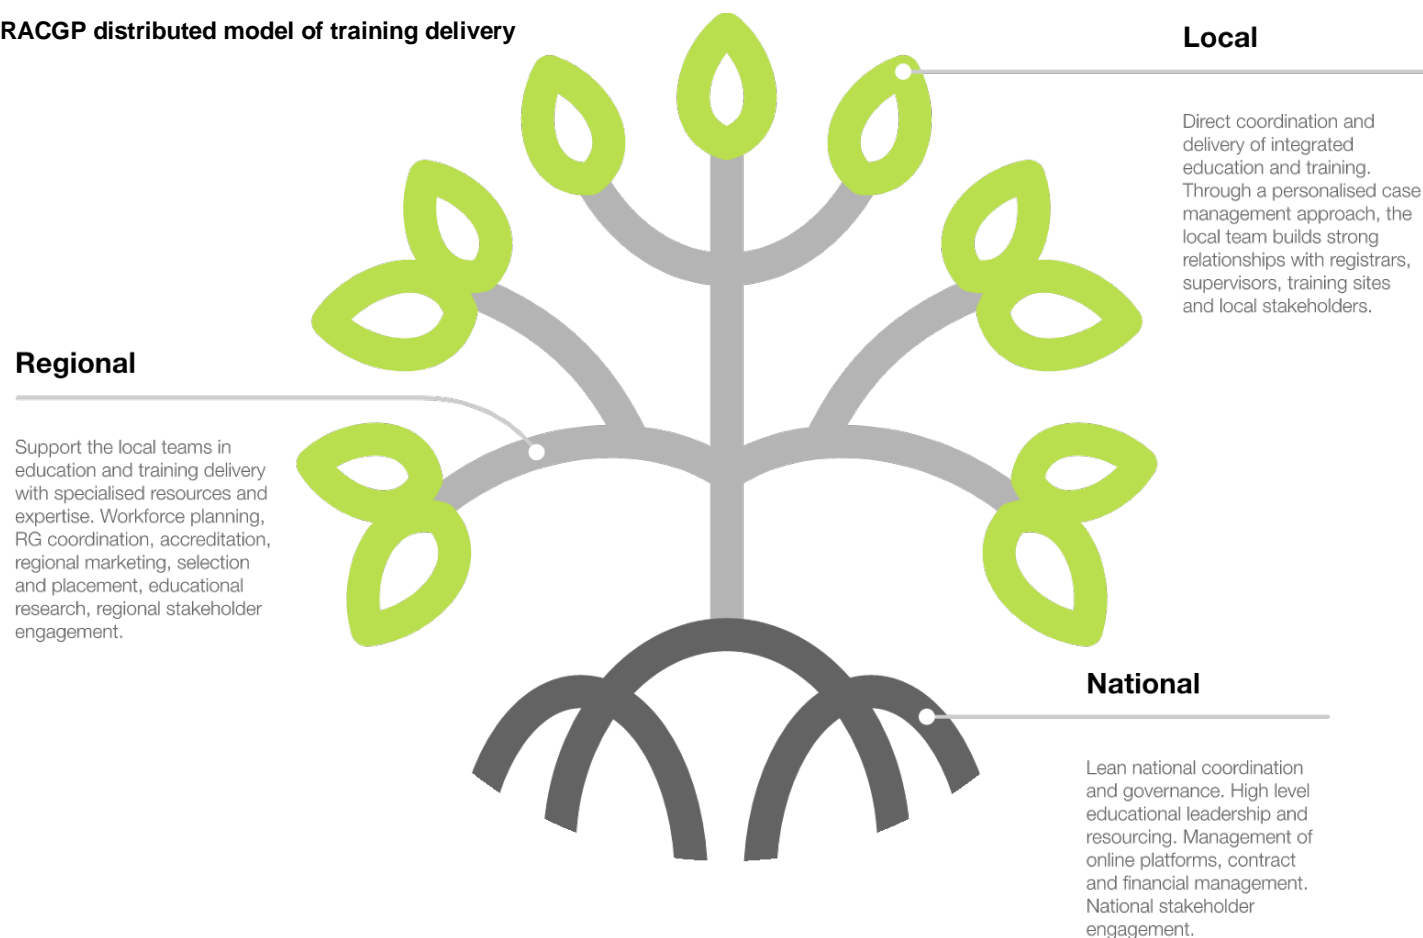

Key work units in the RACGP distributed model

The RACGP will adopt a distributed model in which training is delivered locally by local teams with local knowledge and relationships with local stakeholders (fig 2). Local training delivery will be supported by centralised services and resources. This model will emphasise relationship-based training, which is the basis for the development of professional attributes and behaviours. A personalised case management approach to support registrars, supervisors and practice sites is fundamental to the RACGP model. Personalised case management supports relationship-based training and is an evidence-based means of achieving educational and workforce distribution outcomes. Regional teams will provide expert support to local teams and augment locally based training. Regional teams will also provide coordinated stakeholder engagement. Nationally coordinated governance will provide national consistency and cohesion. National oversight of resource development and management will enable broad and equitable access to resources and provide significant efficiencies.

A distributed model is in place in various forms in the programs delivered by the RTOs. In the transition to PLT, the RACGP will work with each RTO to build on the distributed components of their programs.

Figure 2: The RACGP distributed model of training delivery

RACGP local

The local teams will consist of medical educators (MEs), a training coordinator (TC) and an administrator. The local teams will provide contextually relevant education and support. Through the personalised case management approach, the local team will build strong relationships with registrars, supervisors, training sites and local stakeholders. Cultural safety education by local cultural educators (CEs) and cultural mentors (CMs) will be a priority area of education. This will be supported by the local MEs and TC and by regional Aboriginal and Torres Strait Islander teams.

Each local team will manage a group of registrars from entry into the program through to Fellowship. The MEs and TC will work closely together. The MEs will be largely responsible for education management and delivery, and the TC largely responsible for training management. It is likely that much of the local ME workforce will be covered by part-time appointments working together as a small team. The arrangement of the local teams will match the local context.

Area of responsibility	Specific activities
Workforce planning and recruitment	<ul style="list-style-type: none"> • Provide local knowledge and advice to inform workforce requirements, capacity, and planning • Work with local stakeholders to increase training capacity in areas of workforce need • Promote general practice as a career in the local region • Promote and support rural generalist and rural pathways • Engage with local secondary schools, local university clinical schools, rural clinical schools, rural generalist regional networks, PHNs and local hospitals • Engage with local education and training programs delivered by other medical and allied health profession for integrated cross professional training initiatives • Manage local training pipelines • Support and be a role model for medical students and junior doctors with an intention to enter general practice training • Participate in selection processes as required
Registrar support	<ul style="list-style-type: none"> • Registrar case management: <ul style="list-style-type: none"> - support in navigating selection - conduct induction interview - support applications for recognition of prior learning (RPL) - assess RPL applications - provide training advice and planning - facilitate priority placements - provide pastoral support and mentoring - approve extended skills learning plans - manage 'completion of training' process - conduct exit interviews • Facilitate Medicare provider number applications • Organise 'meet and greet' and other social networking events • Monitor and facilitate registrar progress

Area of responsibility	Specific activities
Registrar education	<ul style="list-style-type: none"> • Identify significant registrar progress issues and escalate to regional team • One-on-one and group communication in relation to individual and local training matters
Training site support	<ul style="list-style-type: none"> • Orientate registrars to community-based training • Manage and facilitate out-of-practice education activities in small groups • Provide in-practice teaching when the practice does not have the resources to do this • Oversee and support registrar workplace-based assessments and clinical teaching visits • Review progress of registrars as a member of the registrar progress review committee and sign-off on exam readiness • Escalate and co-manage focused learning interventions and remediation plans with RACGP regional • Support supervisors to plan and undertake professional development • Provide case management support in: <ul style="list-style-type: none"> - building training capacity - meeting accreditation requirements - meeting training standards • Provide a known point of contact for practice managers for training program advice and support • Hold practice manager workshops • Train and support practice managers to use training IT systems • Monitor and manage performance with escalation to regional team as required • Communication in relation to site specific and local training issues
Supervisor support and education	<ul style="list-style-type: none"> • Recruit supervisors • Support supervisors to meet supervisor accreditation requirements • Ensure supervision meets the training standards • Be the point of contact for supervisors for in-practice supervision and teaching advice • Provide support for in-practice teaching and assessment • Coordinate and facilitate small group professional development and peer networking activities • Support professional development for in-practice supervisory team • Train and support supervisors to use training IT systems • Contribute to regional supervisor professional development events • Monitor and co-manage performance with escalation to regional team as required • One-on-one and group communication in relation to individual and local training matters
Aboriginal and Torres Strait Islander cultural and health training	<ul style="list-style-type: none"> • Engage with local Aboriginal and Torres Strait Islander health services • Support local Aboriginal and Torres Strait Islander students to consider and embark on a career in the health professions • Facilitate cultural safety training and mentorship by local cultural educators and cultural mentors for: <ul style="list-style-type: none"> - registrars - supervisors - training sites - RACGP local team

Area of responsibility	Specific activities
Other	<ul style="list-style-type: none">• Participate in regional and national committees and workgroups as required• Participate in the broader Medical Educator and Training Coordinator communities• Participate in exam preparation activities• Liaison with local Aboriginal and Torres Strait Islander communities and health services• Provide advice on RACGP training policies and procedures• Manage local training records, data collection and reporting requirements• Add local content to whole of region communication

RACGP regional

Regional teams will have responsibilities that parallel the more centralised activities of the RTOs. When building the PLT regional units, the resources and organisation of the current RTOs will be drawn on. The RACGP faculties will have an increased engagement in training at a regional level.

A key focus of the regional team is to support the local teams with specialised resources and expertise. There will be formal lines of oversight and support between the local MEs and TCs with senior regional staff. Identified significant local training progress and performance issues will be escalated for management and oversight at a regional level. Training site accreditation will be managed at regional level. Selected educational activity will be undertaken at a regional level focussing on education that is amenable to larger groups and that requires special resourcing.

Oversight of key stakeholder support and engagement will be undertaken at a regional level. These stakeholders include regionally relevant training, clinical service, and representative organisations. Registrar, supervisor, and practice manager liaison officers will work at a regional level providing support and advocacy for their respective stakeholder groups. These liaison officers will also provide an important conduit between their representative organisations and RACGP.

Area of responsibility	Specific activities
Rural and other areas of workforce need workforce planning	<ul style="list-style-type: none"> Analyse regional workforce needs using HeaDS UPP and other relevant data, and local knowledge provided by local teams Develop training site capacity in areas of workforce need – supported by local teams Determine distribution of placements, limiting placements in areas that do not have a workforce need Develop and manage training pipelines based on workforce needs – supported by local teams Work with other regions to manage cross-regional workforce pipelines and placements
RG pathway development and coordination	<ul style="list-style-type: none"> Engage closely with rural generalist (RG) coordination units Develop and maintain training sites for Additional Rural Skills Training (ARST) in collaboration with regional health services Develop and manage placements for emergency skills development Conduct marketing and recruitment for direct entry into RG pathways Conduct marketing and recruitment for lateral entry into RG pathways for non-RG registrars – supported by local teams Manage RG training placements Manage RG pipeline
Aboriginal and Torres Strait Islander cultural and health training	<ul style="list-style-type: none"> Provide coordination and support of Aboriginal and Torres Strait Islander Health and cultural education at a regional and local level Liaise with Aboriginal and Torres Strait Islander organisations and health services Build and support training pipelines for Aboriginal medical services (AMS) and Aboriginal Community Controlled Health Organisations (ACCHOs) Coordinate support for Aboriginal and Torres Strait Islander registrars, including recruitment into training and support throughout training Coordinate the employment of and support for cultural educators and mentors within the region Support local cultural safety training Administer salary support for AMS and ACCHO placements, in collaboration with RACGP partners Manage engagement with, and networking, support and professional development for cultural educators and mentors

Area of responsibility	Specific activities
Accreditation	<ul style="list-style-type: none"> • Manage training site accreditation – supported by local teams • Manage supervisor accreditation – supported by local teams • Manage de-accreditation
Performance management	<ul style="list-style-type: none"> • Adverse event and critical incident management • Management of significant training progress issues • Support local teams with management of registrar educational interventions • Registrar remediation – supported by local teams • Supervisor and training site performance management – supported by local teams
Education and training	<ul style="list-style-type: none"> • Oversight of training progress management • Provide medical education leadership and specialised training support for the local teams • Provide educational support for local teams • Provide regional supervisor workshops • Provide regional registrar workshops • Provide exam preparation support and mock exams for registrars • Train supervisors to deliver workplace-based assessments • Contribute to national educational development
Other	<ul style="list-style-type: none"> • Selection of registrars • Placement of registrars • Marketing • Manage supervisor, practice, and registrar payments • Engage with regional stakeholders • Support educational research and academic posts • Conduct evaluation and quality improvement activities • Provide advocacy for supervisors – Supervisor Liaison Officer • Provide advocacy for registrars – Registrar Liaison Officer • Regional support for practice managers – Practice Manager Liaison Officer • Provide decisions and advice on policy and standards – State Censor • Manage regional communication

RACGP national

RACGP national will oversee the overall program governance and coordination. It will also provide high-level educational leadership and resourcing. RACGP national will also be responsible for setting a cohesive and collaborative culture across the whole program.

Generic activities, such as managing the PLT online platforms, contract management and financial management, will be done centrally. The intention is to have a central office to enable efficient and effective training delivery in the regions and local areas with a national coherence.

Specific national responsibilities

- Liaison with government departments
 - Liaison with ACRRM
 - Educational policy and standards
 - Educational frameworks, national curriculum and syllabus management
 - Program governance and coordination
 - Program finances
 - National stakeholder engagement
 - National marketing
 - Regional oversight and support
 - National communications
 - Training application and eligibility
 - Training provider numbers
 - IT platforms
 - AMC accreditation
-

Specific activities with national oversight

- Workforce planning and training distribution
 - Training pathways – RG, rural and general
 - Aboriginal and Torres Strait Islander cultural and health training
 - Remote locum and supervision support program
 - Accreditation
 - Progressive assessment
 - Program evaluation and quality assurance
 - Educational research and academic posts
 - Critical incidents, remediation, and performance management
-

Part one: Training pipelines

The transition to PLT provides an opportunity to create flexible, coordinated and sustainable training and workforce pipelines. Training pipelines optimise recruitment and retention of registrars into training pathways with specific end points and are well recognised as an effective means of building the health work force in areas of need. In PLT these training pipelines include broad pipelines for general, rural and RG training and specific pipelines for particular areas of training and workforce need. For specific pipelines, registrars receive targeted support to ensure they have access to the skills and training experiences necessary for them to work in that pipeline's area of training and workforce need.

Objectives

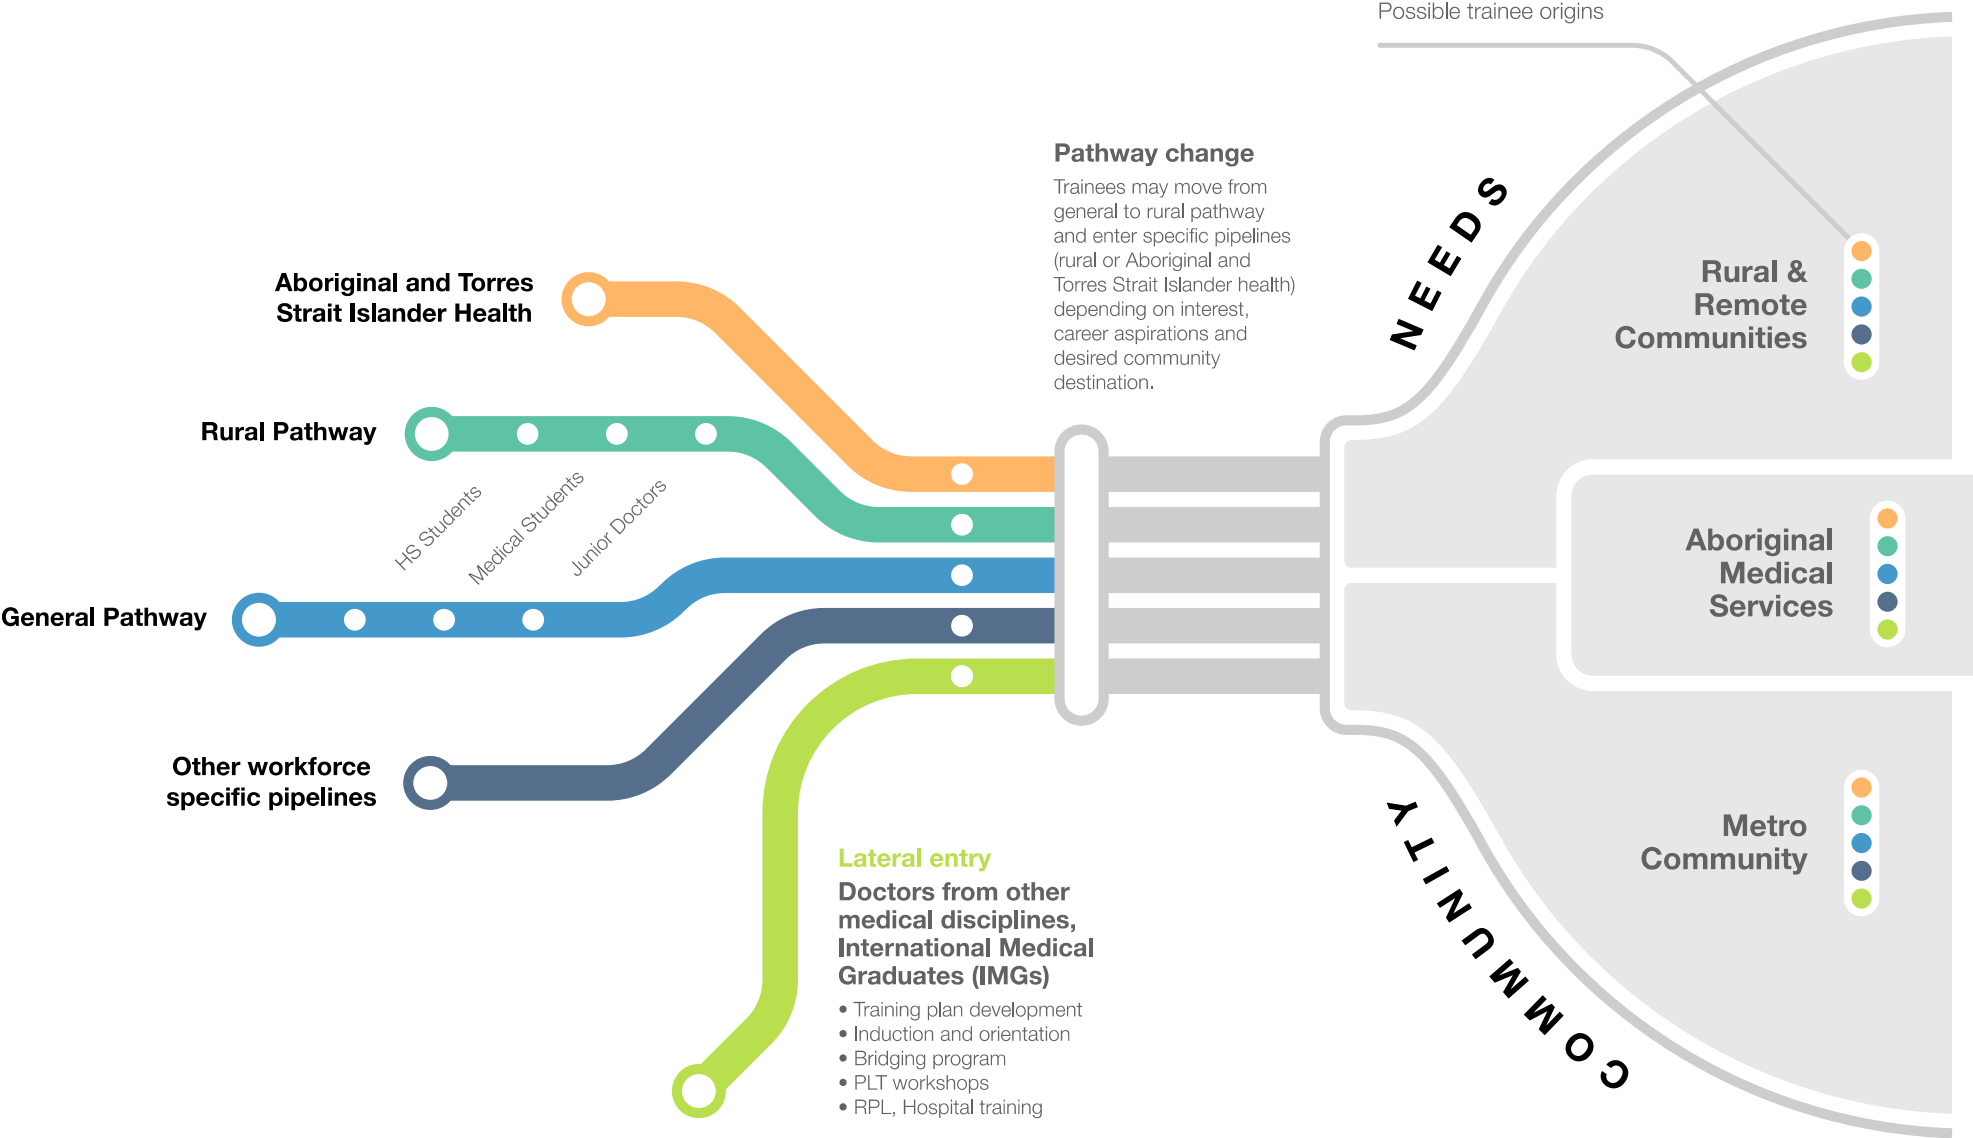

- To design a training model that is inclusive of all potential participants of the general practice workforce.
- To attract trainees by championing general practice as a career of choice.
- To enable multiple entry points to general practice training through a flexible approach and contextualised processes.
- Increased uptake and completion of rural generalist training.
- Increased uptake and completion of training in areas of workforce need.
- Increased uptake and completion of training in Aboriginal and Torres Strait Islander medical services.
- Increased uptake and completion of training by Aboriginal and Torres Strait Islander doctors.

Key points of the training pipeline

- Early planning will be essential, with personalised case management for potential applicants. Career advice and planning will streamline training and support long-term retention of registrars. Case management and support of all members across the general practice lifecycle aims to improve rural retention.
- Enhanced collaboration with university partners, rural clinical schools and hospitals will allow pooling of resources and operational efficiencies to establish interest in general practice and build strong pipelines.
- A nationally coordinated approach to targeted recruitment, with a dedicated national coordinator and regional administrators. This will enable national oversight and facilitate making opportunities available to suitable applicants.
- Flexible supervision models to support the diverse contexts of general practice training.
- Flexibility to move between different training pathways and regions to enable mobility of the workforce and increase the uptake of training in areas of need.
- National coordination/liaison with Aboriginal and Torres Strait Islander health stakeholders and practices, supported by dedicated regional and local administration and case management.
- Most resources needed to support the pipelines already exist. They can be streamlined to support the goals of the training program. Operational teams and relevant policies and procedures will need to be in place before day one to coordinate these resources.

The model described above should be able to start on day one of PLT operation. Planning the targeted recruitment component early will support rural locations with high workforce needs. To facilitate this model as soon as possible, planning should begin with stakeholders who have expressed a desire to work with the RACGP.

Figure 3: RACGP supported training pipeline development

Student, international medical graduate and prevocational doctor engagement

Recruitment into a training pipeline requires engaging with potential applicants in a way that presents the training and its end point as attractive.

Activity	Provided by	Resources	Outcomes
Promotion of GP training particularly in rural locations to secondary school students See marketing	<ul style="list-style-type: none"> • RACGP local • RACGP national 	<ul style="list-style-type: none"> • Community GP champions: state faculty council members and community GP members • School career counsellors • Secondary school – private and public • TAFEs • Local Aboriginal and Torres Strait Islander groups • Marketing and communication team - marketing material 	<ul style="list-style-type: none"> • There is a strong national promotion of general practice • Local teams build relationships and networks with local secondary schools. • GP champions have a presence in local high schools
Engagement with Aboriginal and Torres Strait Islander school students	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • Aboriginal and Torres Strait Islander Health Faculty • Aboriginal and Torres Strait Islander GP champions • IGPRN • AIDA • Local Aboriginal and Torres Strait Islander groups • Land councils • Marketing and communications teams • Marketing materials 	<ul style="list-style-type: none"> • Careers in health are promoted to Aboriginal and Torres Strait Islander students in contextualised and effective ways • Strategic engagement and promotion are done in partnership with peak Aboriginal and Torres Strait Islander health organisations such as IGPRN, AIDA, IAHA, NAATSIHWP, CATSINaM • A sustainable annual school and community engagement program is run in collaboration with key partners such as universities
Engagement with medical students	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • RLO / GPiT Faculty members • RACGP membership services • University medical schools, rural clinical schools • Medical student networks (eg AMSA, GPSN) • University liaison officers, rural term coordinators • Aboriginal health liaison from the medical schools • GP advocates who teach medical students • GP mentors • Rural health hubs • Marketing materials • RACGP Aboriginal and Torres Strait Islander Health Faculty 	<ul style="list-style-type: none"> • Profile of general practice and rural general practice as a career path is enhanced by <ul style="list-style-type: none"> - Regional and local representation at medical student speciality promotion events - Membership promotion to medical students - Partnerships and collaboration with universities - Support programs such as GP Student Mentor network, Bush Bursary program, Rural Student Scholarships

Activity	Provided by	Resources	Outcomes
Engagement with Aboriginal and Torres Strait Islander university students	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • RACGP Rural Faculty • RACGP specific interest groups • Aboriginal and Torres Strait Islander Health Faculty • IGPRN • AIDA • IAHA • Universities • NAATSIHWP • CATSINaM 	<p>There is regular engagement with Aboriginal and Torres Strait Islander medical students. Supportive strategies include:</p> <ul style="list-style-type: none"> • RACGP Aboriginal and Torres Strait Islander Health Faculty annual medical student bursary to attend GP conferences and engage with RACGP and National Faculty of Aboriginal and Torres Strait Islander Health • Medical student position on National Faculty of Aboriginal and Torres Strait Islander Health Council • Partnership with peak Aboriginal and Torres Strait Islander health organisations • Partnerships with IGPRN in their engagement with local medical students interested in general practice and their biannual online student information sessions • Partnership and collaboration with universities • RACGP membership promotion to Aboriginal and Torres Strait Islander medical students
Engagement with junior and hospital doctors	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • RACGP membership services • Hospital administration, directors of training and career event organisers • RWAs and other workforce agencies • State faculty councillors and members • Partnerships with RWAs and RGCUs • State health departments (eg WA pilot program) • RACGP Rural Faculty • RACGP Aboriginal and Torres Strait Islander Health Faculty • Marketing team and marketing materials • GPiT Faculty • Registrars and recent Fellows • GP and IMG champions • GP mentors 	<ul style="list-style-type: none"> • Partnerships are established with other healthcare stakeholders for junior doctor general practice promotion campaigns. • Promotion of GP training to junior doctors by contributing to <ul style="list-style-type: none"> - Career events - Junior doctor networking events - Relevant conferences • Promotion of GP training to Aboriginal and Torres Strait Islander junior doctors by contributing to <ul style="list-style-type: none"> - AIDA conferences - IGPRN workshop events • Networking opportunities for JMOs to meet with current registrars, GPs, RGs and rural GPs
Engagement with hospital-based international medical graduates (IMGs)			

Activity	Provided by	Resources	Outcomes
Case management of students, and doctors with expressed interest in general practice	<ul style="list-style-type: none"> • RACGP national • RACGP regional • RACGP local 	<ul style="list-style-type: none"> • GP facilitators who teach hospital JMO's • RACGP Rural Faculty • RACGP Aboriginal and Torres Strait Islander Health Faculty • GPiT Faculty • PHNs • RWAs • Registrars and recent Fellows • GP and IMG champions, • GP mentors • Cultural mentors • IGPRN 	<ul style="list-style-type: none"> • Those identified with an interest in GP are connected with national and regional pre-training case management coordinators who facilitate: <ul style="list-style-type: none"> - career planning advice - connection with mentors and local GP champions - connection with local GP networks - access to relevant bursaries and immersive experiences • Prospective Aboriginal and Torres Strait Islander registrars are supported in accessing culturally relevant supports, networks and specific resources
Provide support to applicants to join training through PLT or to a GPE Pathway program	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • PLT eligibility and selection team • GPE program selection team • Administrators to manage inquiries • Online FAQs / information videos • Online / phone advisors • IT platform 	<ul style="list-style-type: none"> • Support is provided to potential applicants to either of the RACGP's pathways to Fellowship

Lateral entry into GP training and recognition of prior learning

Lateral entry refers to doctors who enter GP training at different points of their career. Rather than early entry after the junior hospital year, a doctor may work for several years in different hospital positions or undertake other specialist training before joining general practice training. Others may have worked overseas in generalist or specialist capacities and are seeking to work as a GP in Australia. These applicants' experience and skills may mean they are eligible for recognition of prior learning (RPL). Applicants may not have the required recent Australian hospital experience and require special support to bridge that gap.

Lateral entry candidates will go through the usual application, eligibility and selection processes as listed in the Eligibility and selection section.

Activity	Provided by	Resources	Outcomes
Assessment of hospital term requirements, eligibility for RPL, and readiness for GP term	<ul style="list-style-type: none"> • Censors • RACGP local 	<ul style="list-style-type: none"> • PLT admin team • Online submission process 	<ul style="list-style-type: none"> • Eligibility for RPL including readiness for GP terms is assessed early • Training experience gaps are identified • RPL assessments and identified training experience gaps inform individual training plan development.
Training plan development	<ul style="list-style-type: none"> • RACGP local 	<ul style="list-style-type: none"> • Regional Senior ME • Training plan templates • Learning resources • Syllabus 	<ul style="list-style-type: none"> • Training plans are developed at the start of training and inform placement • Training plans are developed with the registrar and ME to address identified gaps (See induction and orientation section)
Bridging programs	<ul style="list-style-type: none"> • RACGP local • RACGP regional 	<ul style="list-style-type: none"> • PLT workshops – need a dedicated regional team to provide this • Dedicated training sites • External skills-based training providers / workshops • RGCUs • Regional senior ME • IT – training needs mapping and planning tool to aid placing lateral entry candidates in an appropriate training stage 	<ul style="list-style-type: none"> • The number of potential GPs entering into training is maximised • Lateral entry registrars receive tailored support, education and training to address their training gaps

Enhancing pre-GP term training

The first part of the pipeline is pre-GP term training which may occur before or after entry into the PLT program

Activity	Provided by	Resources	Outcomes
Hospital training terms	<ul style="list-style-type: none"> Hospitals: public and private RACGP regional 	<ul style="list-style-type: none"> State health departments (eg WA pilot program) Postgraduate medical councils (PMC) PMC handbooks RGCU's 	<ul style="list-style-type: none"> Collaboration between RACGP regional team and Department of Health/private hospitals There is adequate exposure to a range of quality clinical rotations relevant to general practice via networks and agreements with public and private hospitals RGCU advocates for RGs requiring specific prerequisite training
Community terms (during hospital training program)	<ul style="list-style-type: none"> RACGP local RACGP regional 	<ul style="list-style-type: none"> State health departments - funded by state health department as part of hospital training program National DoH funded programs such as the Rural Junior Doctors Training Innovation Fund (RJDITF) Training sites Training organisations including RGCUs PMC handbooks RACGP national accreditation team 	<ul style="list-style-type: none"> Training terms are coordinated with state Departments of Health Registrars experience community context and achieve requisite clinical competencies prior to GP terms Quality general practice exposure is ensured by the local team through accreditation, monitoring and evaluating practices There are clear guidelines for pre-GP term community practice accreditation (same as GP training sites or special focus, eg paediatric)

Development of specific pipelines into areas of workforce need

As well as the pipeline into general practice training and the pipelines for RG and rural pathways, there will be specific pipelines for particular areas of training and workforce need.

Activity	Provided by	Resources	Outcomes
Identification of areas requiring specific pipelines	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • Both qualitative and quantitative information • HeaDS UPP data • Community profiling tool • Medical workforce information • Health workforce needs data collected by other organisations – particularly PHNs, RWAs, NACCHO/ACCHO and training organisations. • Distribution Priority Area data 	<ul style="list-style-type: none"> • There is clear identification of areas of GP workforce need amenable to a training pipeline including: <ul style="list-style-type: none"> - rural and remote communities - Aboriginal and Torres Strait Islander health - underserved communities • GP workforce needs are mapped against current training placements • Areas of workforce need that can be addressed by training are identified
Creation of pipelines into areas of workforce need	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • See Training Capacity development • National and regional training pipeline coordinators • RACGP Rural Faculty • NACCHOs • RACGP Aboriginal and Torres Strait Islander Health Faculty 	<ul style="list-style-type: none"> • Specific training pathways are developed to support training in identified areas of workforce need. Typically, these pathways will have <ul style="list-style-type: none"> - quarantined relevant training sites - educational activities to support the development of required specific skills

Targeted recruitment

There will be targeted recruitment to RG and rural pathways (see RG and Rural GP section). There will also be targeted recruitment to the specific pipelines for particular areas of training and workforce need. This targeted recruitment will be to both prospective registrars and registrars already in training.

Activity	Provided by	Resources	Outcomes
Promotion of RG and rural pathways	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • See RG and rural training • See Marketing 	<ul style="list-style-type: none"> • RG and rural pathways are presented as attractive options for prospective registrars and registrar on the general pathway

Part two: Registrar education and training

Eligibility and selection

Eligibility sets the minimum requirements to be met by all prospective registrars. Selection determines who will gain a training position and in what region the applicant will be offered a position. Eligibility and selection processes for doctors to enter general practice training need to be clear and transparent.

The RACGP is committed to the Closing the Gap Initiative and improving access to training in general practice for Aboriginal and Torres Strait Islander doctors. Provision will be made in the selection process to prioritise the selection of Aboriginal and Torres Strait Islander doctors and enable allocation to a region that meets their family and cultural needs.

Objectives

- There is a clear and transparent selection process for doctors to enter general practice training.
- Eligibility requirements are clearly outlined and accessible to all prospective applicants.
- Eligibility requirements are met by all prospective registrars.
- Allocation of registrars to regions is transparent.
- Department of Health requirements for registrar distribution are met.
- Aboriginal and Torres Strait Islander doctors are supported to pursue a career in general practice.
- Applicants on a rural generalist training pathway are supported in demonstrating eligibility and achieving selection.

The current eligibility and selection processes, with the selection assessment ranking scores determining regional allocation for interview in a region, will remain unchanged at day one of transition. The PLT selection model for determining regional allocation on the basis of factors beyond a ranking score will be developed and instituted subsequent to transition to PLT.

Activity	Provided by	Resources	Outcomes
Assess eligibility	<ul style="list-style-type: none"> • RACGP national 	<ul style="list-style-type: none"> • Application portal • Work instructions • Application Handbook 	<ul style="list-style-type: none"> • Applicants can easily access the eligibility requirements • Applications are assessed for eligibility and informed of the outcomes • Applicants with Medical Registration conditions and / or notations are considered by a review panel to determine their eligibility

Supporting registrars

Registrar support is a defining feature of general practice training, with a particular emphasis on the wellbeing of registrars. PLT support for registrars will be built on the highly developed and successful registrar support programs delivered by the RTOs. A personalised case management approach to registrar support is a foundational feature of the PLT design (fig 4). This approach recognises that the best training outcomes are achieved by recognising that each registrar comes with their own specific context, needs and aspirations. These must be considered in training planning and training pipeline management. Matching the strengths and educational needs of a registrar with a community's needs is important. This is particularly the case for enabling registrars to train and remain in areas of workforce need.

Registrar support includes promoting attention to registrar's health, wellbeing, and self-care. Pastoral care will be provided. A supportive and confidential approach will be taken in dealing with registrar issues and complaints. Ensuring cultural safety for registrars is a priority. PLT recognises that training sites and supervisors are key to providing registrar support and will invest in enabling training sites and supervisors to provide a supportive environment for registrars. Certain groups of registrars, including part-time registrars may require additional and specialised support; this will be coordinated by designated MEs.

To improve workforce and training equity, Aboriginal and Torres Strait Islander registrars will have enhanced access to general practice and rural generalist training via pre-vocational pipelines and will be offered additional support at all levels of training. This will be achieved through consultation with the Aboriginal and Torres Strait Islander community and existing health education agencies.

Objectives

- Optimise the development of each registrar.
- Ensure Aboriginal and Torres Strait Islander registrars have access to dedicated and culturally safe supports.
- Provide support to enhance training and retain registrars in areas of workforce need during and beyond training.
- Support a culture that values wellbeing in the profession.
- Monitor each registrar's progress throughout training and address any concerns.
- Identify problems early to ensure that targeted support is provided.
- Develop processes to effectively address any problems that arise during placement.
- Provide clear, safe and supported complaints and appeals processes for registrars.
- Manage complaints according to a clear, transparent and fair process aligned with the [RACGP Complaints Policy](#).
- There are robust processes and support mechanisms to minimise and address registrar bullying and harassment.

It is recognised that the PLT case management model represents a change from some of the current RTO practices. This change will be managed in a way that minimises disruption to training and maximises personalised case management support. This model aims to provide tailored support for registrars' training and personal needs, and ensure robust processes are in place to optimise outcomes.

Figure 4: Supports for the registrar, supervisor and the supervisory relationship

Inducting registrars and planning their training

Induction of registrars following selection is important for initial orientation to training, initial training planning and for an early assessment of eligibility for recognition of prior learning (RPL). The induction process will include gathering information on previous training, learning, and experience of registrars, and on their training aspirations. This will be used to develop their initial training plan. The induction assessment will determine readiness to enter general practice terms or the need to undertake further training in hospital posts.

Induction to the training program will include completion of a learning module and a one-on-one interview with an ME and a TC.

The learning module will provide registrars with information about:

- the PLT program (including education policies and guidance, and training opportunities)
- Fellowship of the RACGP (FRACGP) training and assessment requirements
- the role of the registrar liaison officer
- the RACGP National Faculty for GPs in Training
- other support available, including RACGP member services (e.g., the GP Support Program)
- training locations and obligations
- placement processes
- applying for a provider number
- financial assistance
- specific support available to Aboriginal and Torres Strait Islander registrars
- the medical education team
- the need for medical indemnity and medical indemnity requirements
- the RPL process

The one-on-one interview will be used to:

- assess prior experience for informing the training plan and for likely eligibility for recognition of prior learning
- assess the implications of any registration conditions
- develop an initial training plan, including the readiness for GP term placement or need for further hospital-based placement
- identify interest and suitability for a training pipeline

Objectives

- A supportive relationship for the registrar with training program staff is established.
- An initial training plan is discussed and agreed on.
- The registrar has a clear understanding of the requirements and expectations of the training program.
- Key information about the training journey of the registrars is collected and documented.

Whilst there is a defined process and resources provided to support registrar induction, regional and local variations in delivery will ensure these are contextualised to registrar needs, as well as training site and supervisor preferences.

Activity	Provided By	Resources	Outcomes
Induction learning module	<ul style="list-style-type: none"> RACGP national 	<ul style="list-style-type: none"> National online module 	<ul style="list-style-type: none"> Registrars complete the online module prior to meeting with the medical educator The module informs the registrar about the training program and associated processes Registrars submit evidence of experience (e.g., term statements, supervisor reports)

Educational interventions

Low-stakes educational interventions are managed at the local and practice level. Higher-stake and more substantial educational interventions and remediation will be managed with regional expertise. It is expected that local teams will draw substantially on regional support in dealing with educational interventions.

Education training components

Hospital training terms

The year of hospital training represents a significant proportion of the training time. It offers registrars the opportunity to acquire the competencies necessary to commence in general practice, including experience in a variety of clinical disciplines and the opportunity to gain an understanding of the interface between primary and hospital care. Through educational activities during hospital training, the RACGP will develop links with hospitals, develop the training pipelines and promote general practice as a career choice.

The activities required for PLT during the hospital terms are related to hospital liaison and providing registrars with support, development, and training.

Objectives

- Training pipelines are supported and promoted.
- General practice as a career option is promoted.
- Hospital-based registrars are orientated to the training program and to general practice.
- General Practice focused support and education is provided, and links hospital experience with the general practice context.
- Registrars are assisted to plan their training to optimise their training experience.
- Registrars' progress is overseen and monitored to ensure that registrars meet the key competencies and program requirements to commence in general practice.
- Doctors based in hospitals have little contact with general practice. Increasing the profile of general practice occurs through participation in educational activities and careers events. Educational activities include the junior hospital doctor program, as well as additional activities offered for registrars. Involving external GPs and GP supervisors in such events and events to others outside of GP training (such as other hospital-based doctors or medical students) will also increase exposure to general practice.
- Liaising with hospitals is important in developing training pipelines and in ensuring that registrars have priority access to quality clinical terms relevant to their training. This may be done through local linkages, but ideally will be supported nationally. Increased visibility and presence of registrars during hospital rotations, with relevant positions identified and prioritised for allocation, could help attract trainees to general practice.
- There will be a focus on support and educational activities to highlight the link between current work and general practice, and the opportunity to orientate to the generic aspects of general practice and support registrars to plan their training program. Assessment should be included as evidence of progression towards the key competencies.

Key points on hospital-based training

- Create consistency in the support offered both individually and educationally during the hospital training time.
- Strengthen participation in hospital events and pipelines (as an example, the Western Australia model is well developed).
- Develop local linkages with hospitals early, as these take time.
- Develop priority placements and training pipelines as soon as possible, as these will take some time to establish. This builds on existing partnerships with rural generalist coordination units, but ideally should be broadened nationally.

Some of the career events may overlap with marketing activities described in this document.

It is expected that all activities should be able to commence from day one, except for some of the hospital liaison work, which requires continuing advocacy at a high level.

Activity	Provided by	Resources	Outcomes
Liaise with hospital networks	<ul style="list-style-type: none"> RACGP local RACGP regional 		<ul style="list-style-type: none"> Existing relationships with hospital networks are maintained and new ones developed GP registrars training in hospitals are allocated terms relevant to general practice The RACGP participates in educational and career related events within the hospital networks

Community-based training

In-practice education and support

Work-based learning within community general practice under supervision is the core of GP training. It provides the opportunity to learn what it is to be a GP and what a quality general practice looks like. It is also the means of gaining knowledge and skills through practice. In-practice education with a learner centred focus is the primary orientation of PLT education. PLT registrar workshops have an emphasis on facilitated small group peer-to-peer learning and benchmarking to foster engagement and professional identity development.

Objectives

- Registrars learn in the context of supervised practice to become a GP.
- Supervision is matched to the level of competence of the individual registrar – Standard 1.1.
- Supervision is provided that ensures quality training for the registrar and patient safety – Standard 1.2.
- A safe practice environment is provided for the registrar and supports training – Standard 1.3.
- The development of each registrar is optimised – Standard 2.3.
- Learning activities based at the training site are planned, structured, and referenced to the RACGP Curriculum and the learning needs of the registrar – Outcome 2.2.1.

Key points on in-practice education and support

- A national framework for in-practice orientation.
- A focus on supporting registrar self-directed learning.
- An emphasis on supervisor expertise in clinical debriefing and mentorship.
- In-practice teaching guided and supported by the RACGP syllabus
- National online resources to support in and out of practice education that can be adapted for regional and local use.

Activity	Provided by	Resources	Outcomes
Orientation to the practice	<ul style="list-style-type: none"> • Supervisory team • Practice staff 	<ul style="list-style-type: none"> • National orientation framework • National orientation resource for common processes • Orientation template 	<ul style="list-style-type: none"> • Registrars receive <ul style="list-style-type: none"> - a structured orientation to the practice clinical and organisational environment - an orientation to the GP consultation - an out-of-practice orientation to key GP processes (Medicare billing, etc) see out-of-practice educational workshops section

Teaching and learning planning	<ul style="list-style-type: none"> Supervisor RACGP local 	<ul style="list-style-type: none"> Registrar Portfolio Learning planning support tools Teaching plan template See supervisor support and expectations section 	<ul style="list-style-type: none"> Registrar and lead supervisor engage in a learning and teaching planning discussion as part of the practice teaching plan. This is undertaken quarterly as a teaching activity

Out-of-practice educational workshops

Out-of-practice educational workshops augment the training that occurs within the workplace. They provide for group learning, which is a means of peer benchmarking and support. They provide access to education that requires specific resourcing not easily provided within the practice environment, including exam preparation. They also provide interactions with experienced practitioners and educators from outside the registrar's work environment.

Objectives

- To enable the registrar to connect and engage with peers.
- To deliver the RACGP curriculum – Outcome 2.1.2.
- To engage the registrar with a range of experienced GPs.
- To provide the registrar with access to training that is not easily provided within the practice environment.
- To support the in-practice learning of the registrar with out-of-practice workshops.

Key points on community-based training (out-of-practice educational workshops)

- An emphasis on small, locally facilitated peer workshops.
- Workshop activity augments in-practice learning.
- Syllabus structured support for workshop content.
- Aboriginal and Torres Strait Islander cultural and health training is embedded in the educational workshop program.
- Utilising registrar and supervisor expertise for workshop content.

Activity	Provided by	Resources	Outcomes
Delivering peer learning workshops	<ul style="list-style-type: none"> • RACGP local • Local cultural educators/ mentors 	<ul style="list-style-type: none"> • Syllabus-based session guidelines and resources • Flipped classroom online resources • Venue to host small groups • Program templates for peer-led learning groups 	<ul style="list-style-type: none"> • Regular semi-structured facilitated small peer group workshops sized at around eight registrars to a medical educator. The expectation is that these are initially structured to the syllabus and later shifting to a group determined structure • Local Aboriginal and Torres Strait Islander health and cultural training is key component of the local peer workshop syllabus
Delivering regional workshops	<ul style="list-style-type: none"> • RACGP local • RACGP regional 	<ul style="list-style-type: none"> • Syllabus-based workshop outlines • Flipped classroom online resources • Educational tools and equipment • Contracted experts • Large venue • Cultural educator/cultural mentors • Exam preparation resources 	<ul style="list-style-type: none"> • Five full days annually of centralised whole-of-region large group workshops • Delivery of education that is suited to a large group format including education that: <ul style="list-style-type: none"> - is generic - benefits from specialised expertise - requires specific resourcing • Regional workshops include:

			<ul style="list-style-type: none">- orientation to core clinical processes such as Medicare billing, PBS- Aboriginal and Torres Strait Islander cultural and health training- simulated learning:<ul style="list-style-type: none">▪ emergency skills▪ procedural skills▪ difficult consultation skills- exam preparation- rare but important topics

Online educational support

Online educational support includes a portal for clinical references, a learning management system (LMS) and a training information management platform. Online resources are important for day-to-day clinical decision-making. An LMS is an effective way of delivering generic education to multiple learners. A training information management platform provides efficient and accessible tracking of training progress data.

Objectives

- Registrars have online access to the clinical references they require to enable safe practice.
- Learning across the curriculum is supported by a suite of quality online educational resources - training standards outcome 2.1.2.
- Registrars, supervisors, educators, and administrators have access to a user-friendly platform for storing, accessing, and tracking training progress information – Standard 3.2.

Key points on online educational support

- A national IT platform and LMS will enable a national IT interface and a broad distribution of online learning resources. It is intended that the interface and the first tranche of learning resources will be in place on day one.
- Provision of national access to online resources will improve equity and consistency for registrars, which is transferable across regions.

Activity	Provided by	Resources	Outcomes
Access to just-in-time references	• RACGP national	<ul style="list-style-type: none"> • RACGP library • Access to resources such as Dynamed, RACGP Clinical Guidelines, Electronic Therapeutic Guidelines / Australian Medicines Handbook, AJGP 	<ul style="list-style-type: none"> • Registrars have access to evidence-based references to support their clinical practice
Supporting private learning	• RACGP national	<ul style="list-style-type: none"> • Online learning modules on RACGP LMS: PEP, <i>gplearning</i>, Check 	<ul style="list-style-type: none"> • Registrars have access to high quality educational modules that cover the core RACGP syllabus areas
Supporting pre and post workshop learning	• RACGP	<ul style="list-style-type: none"> • Online learning modules • Online registrar accessed assessments 	<ul style="list-style-type: none"> • Workshops have online pre and post workshop activities to support workshop-based learning
Online tracking of training and training reports	• RACGP national	<ul style="list-style-type: none"> • Training portfolio 	<ul style="list-style-type: none"> • Registrar training is supported by a dynamic training portfolio that outlines training requirements, holds documentation of completed activities, and provides forms that guide training activity and its documentation

Rural generalist and rural GP training

There is a chronic shortage of rural GPs. The rural medical workforce is ageing and it is often difficult to replace retiring GPs, leaving many communities with reduced access to necessary medical services. It is vital that recruitment into rural general practice increases. Achieving this is a key objective of PLT. PLT will actively recruit and nurture those who are interested in working in rural locations. RACGP rural generalist and rural GP training will provide tailored support, case management, and build rural training capability. These activities will ensure registrars are appropriately prepared for the demands of rural practice and will ensure a safe and high-quality training experience. This will improve attraction and retention of GPs into rural locations.

PLT will develop robust, alternative, flexible supervision models to support training where traditional supervision structures are not available.

Objectives

- To improve rural community access to high-quality medical services.
- To ensure community needs are met through a supported rural general practice training pathway.
- To increase the number of GPs who are working in rural locations.
- Retention of rural GPs and rural generalists by facilitating long-term rural careers.

Key points on training of rural GPs and rural generalists

- By having a continuous rural pipeline, the numbers of rural GPs and rural generalists can be increased.
- Rural training encompasses a range of contexts and stakeholders; having national oversight will ensure options and opportunities are considered and coordinated.
- Rural funding is complex and includes negotiations with federal, state, and local groups.
- Aboriginal and Torres Strait Islander healthcare is an important aspect of rural training and intersects with the Aboriginal and Torres Strait Islander health training section of this education program.
- Workforce issues require solutions from many stakeholders. A dedicated team to oversee this is vital.
- Enabling flexibility between rural and non-rural training pathways, as well as between regions, will work to increase recruitment into rural training and rural practice.
- Case management for rural training and building strong rural pipelines will require substantial input from PLT national, regional, and local teams. In this way both registrar training and rural community needs will be addressed.
- To enable operation from day one, staffing and a clear structure will be put in place, making use of existing components.

Activity	Provided by	Resource	Outcomes
Promote RG and rural general practice to registrars via case management	<ul style="list-style-type: none"> • RACGP regional 	<ul style="list-style-type: none"> • Rural workforce agency • Workforce liaison from stakeholder organisations • Marketing team - marketing material 	<ul style="list-style-type: none"> • There is dedicated case management and referral pathway to local teams • Good match of candidates to practices • Increased interest from registrars in rural placements

Aboriginal and Torres Strait Islander cultural and health training

The health of Aboriginal and Torres Strait Islander peoples in Australia is a national priority. The RACGP is committed to working alongside Aboriginal and Torres Strait Islander communities to build a general practice workforce that can work safely and effectively to improve health outcomes and close health equity gaps for Aboriginal and Torres Strait Islander peoples. Support for Aboriginal and Torres Strait Islander health will be integrated across all areas of the RACGP PLT operating model by enhancing existing supports and processes, and adding additional strategies where needed. This work will be driven by Aboriginal and Torres Strait Islander peoples, and will include governance and community engagement strategies and processes that value and respect Aboriginal and Torres Strait Islander communities. The RACGP acknowledges and respects the existing work and relationships of the Aboriginal and Torres Strait Islander health units within training organisations, cultural educators and cultural mentors, and plans to work with these teams during transition and beyond to maintain and strengthen the large body of knowledge and resources that already inhabits this space.

Having a safe and effective approach to embedding Aboriginal and Torres Strait Islander values is crucial to the success of the RACGP PLT educational program, and several strategy and guidance frameworks need to be designed for this program. These include an RACGP cultural safety and governance strategy, a community engagement and partnership strategy, and a national Aboriginal and Torres Strait Islander cultural and health education framework, all of which will be informed by the [RACGP Innovate Reconciliation Action Plan](#) (RAP). Capacity for Aboriginal and Torres Strait Islander cultural and health education and training is also contingent on the mechanism by which the Aboriginal and Torres Strait Islander Health Salary Support Program and Strategic Plan Program funding will be distributed across the general practice training sector. The RACGP National Faculty of Aboriginal and Torres Strait Islander Health is currently leading the design of a project plan to progress this work. The intent is to design and conduct research to evaluate and strengthen Aboriginal and Torres Strait Islander cultural and health training with a view to establishing an evidence-based, best-practice framework that incorporates Aboriginal and Torres Strait Islander leadership, partnerships and community values.

Crucial to improving health outcomes for Aboriginal and Torres Strait Islander communities is to increase the number of Aboriginal and Torres Strait Islander peoples in the GP workforce. Workforce equity is a matter of social justice; improving GP training pipelines for Aboriginal and Torres Strait Islander peoples will help address this. This requires specific recruitment, application and selection support for Aboriginal and Torres Strait Islander registrars. This support is embedded throughout the PLT operating model and is detailed in the relevant sections. The approach is strength based and founded on Aboriginal and Torres Strait Islander research methodologies to ensure safety for Aboriginal and Torres Strait Islander registrars and GPs.

Objectives

- Aboriginal and Torres Strait Islander cultural and health training is guided by robust and culturally appropriate strategies and frameworks.
- Training capacity in Aboriginal and Torres Strait Islander health is increased.
- The RACGP Aboriginal and Torres Strait Islander cultural and health curriculum is delivered.
- The Aboriginal and Torres Strait Islander cultural and health training is delivered to all registrars with advanced training opportunities for interested registrars.
- Aboriginal and Torres Strait Islander health placements are engaged and supported.
- PLT engages with and draws on the support of Cultural Educators and Cultural Mentors and their networks.
- Aboriginal and Torres Strait Islander cultural safety training is provided for:
 - all registrars
 - all supervisors and MEs
 - all RACGP training staff

- for selected practice staff
- There are support structures for all registrars in Aboriginal and Torres Strait Islander health placements.
- There are quality assessment processes for registrar Aboriginal and Torres Strait Islander cultural and health training.
- Evidence-based methods are used to evaluate and improve Aboriginal and Torres Strait Islander cultural and health training.

Design and implement Aboriginal and Torres Strait Islander cultural and health training strategies and frameworks

PLT will develop and implement sound methodologies for attainment of cultural competencies and learning during training and as part of the ongoing professional development of GPs. These methodologies will be guided by a cultural safety governance strategy, a community engagement and partnership strategy, and a cultural and health education framework. These strategies and framework will be designed and implemented in consultation with national peak and other jurisdictional Aboriginal and Torres Strait Islander organisations and will be led by the RACGP National Faculty of Aboriginal and Torres Strait Islander Health.

Delivering the RACGP Aboriginal and Torres Strait Islander curriculum

The RACGP Aboriginal and Torres Strait Island curriculum is integrated in all RACGP PLT education and delivered as specific activities. It is guided by the national Aboriginal and Torres Strait Islander cultural and health education framework, allows local and contextual adaptability, and is overseen and delivered by Aboriginal and Torres Strait Islander peoples with support from the PLT team.

Activity	Provided by	Resources	Outcomes
Delivering a cultural education program for all registrars, MEs, supervisors and other practice and RACGP staff	<ul style="list-style-type: none"> • RACGP local • RACGP regional • Cultural educators and mentors • RACGP national • National Faculty of Aboriginal and Torres Strait Islander Health 	<ul style="list-style-type: none"> • Aboriginal and Torres Strait Islander MEs • Other educators as considered appropriate by cultural education teams • Community engagement and partnership strategy • RACGP Cultural Safety and Governance Strategy • National Aboriginal and Torres Strait Islander cultural and health education framework • Strategic Plan Program Funding • Curriculum/Syllabus 	<ul style="list-style-type: none"> • All registrars, supervisors, MEs and other staff involved in PLT undertake cultural education • Cultural education teams are supported by MEs to deliver cultural safety training especially in the context of racism, unconscious bias and privilege, etc. • There are on-country learning and cultural immersion experiences

Providing Cultural Mentorship for registrars, supervisors, practice staff, medical educators, RACGP training staff	<ul style="list-style-type: none"> • RACGP local • RACGP regional • Cultural mentors 	<ul style="list-style-type: none"> • Community engagement and partnership strategy • National Aboriginal and Torres Strait Islander cultural and health education framework 	<ul style="list-style-type: none"> • Registrars, supervisors, practices and RACGP staff are provided with cultural mentorship relevant to their work context
Ensuring there are adequate and culturally safe supervision models	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national • Supervisors 	<ul style="list-style-type: none"> • RACGP Cultural Safety and Governance Strategy • National Aboriginal and Torres Strait Islander cultural and health education framework 	<ul style="list-style-type: none"> • There are adequate and culturally safe supervision models

Building training capacity in Aboriginal and Torres Strait Islander health

The ability of GPs to work effectively with Aboriginal and Torres Strait Islander peoples to improve their health is essential to close the gap in health outcomes. PLT aims for all registrars to achieve the learning outcomes in the Aboriginal and Torres Strait Islander health unit of the RACGP Curriculum for Australian General Practice, regardless of whether they undertake a training experience in an Aboriginal and Torres Strait Islander health training site.

Detailed in the RACGP [Standards for general practice training](#) are principles aimed at ensuring safe and effective training in Aboriginal and Torres Strait Islander health:

- Aboriginal and Torres Strait Islander Cultural Educators and Cultural Mentors need to be involved in the design, delivery, assessment, and evaluation of training in Aboriginal and Torres Strait Islander health.
- Teams who provide training, including MEs, examiners, supervisors, and practice staff, need to have training in cultural safety.
- Aboriginal and Torres Strait Islander Cultural Educators and Cultural Mentors need to be part of the supervision team in an Aboriginal and Torres Strait Islander health training site.
- An Aboriginal and Torres Strait Islander health training sites will be characterised by governance input from the local Aboriginal and Torres Strait Islander community; this will usually be an Aboriginal Community Controlled Health Service.
- Clinical consultations in Aboriginal Community Controlled Health Services and other Aboriginal Medical Services tend to be longer, more complex, manage more problems at each visit and involve more healthcare practitioners. This should be taken into account when assessing the workload of the registrar.

Activity	Provided by	Resources	Outcomes
Building and strengthening Aboriginal and Torres Strait Islander community engagement	<ul style="list-style-type: none"> • RACGP local • RACGP regional • National Faculty of Aboriginal and Torres Strait Islander Health 	<ul style="list-style-type: none"> • Community engagement and partnership strategy • RACGP Innovate RAP • RACGP Cultural Safety and Governance Strategy 	<ul style="list-style-type: none"> • There is meaningful engagement in education and training with: <ul style="list-style-type: none"> - Local Aboriginal and Torres Strait Islander communities - Peak and jurisdictional Aboriginal and Torres Strait Islander health and other relevant organisations - Regional engagement with relevant Aboriginal and Torres Strait Islander health and other organisations within the regional jurisdiction • There is evidence of RAP activities through the operating program • There is a national representative committee for cultural education

Engaging and supporting cultural educators, cultural mentors and their networks

A significant strength of the delivery of Aboriginal and Torres Strait Islander culture and health education is the employment of Cultural Educators and Cultural Mentors who play a crucial role in supporting high-quality training experiences in their local communities. Cultural Educators and Cultural Mentors are vital to the design and delivery of national, regional, and local education frameworks, and have already developed strong regionally specific education programs using their vast knowledge, experience, and community connections.

Cultural Educators and Cultural Mentors are essential in providing cultural education and collaborative cultural safety training to registrars, supervisors, practice staff, MEs and RACGP training staff. Aboriginal and Torres Strait Islander Cultural Educators and Cultural Mentors need to be involved in the design, delivery, assessment, and evaluation of training in Aboriginal and Torres Strait Islander cultural and health training. Extensive consultation will be undertaken to value and respect the existing and future inputs from Cultural Educators, Cultural Mentors and their equivalents in Aboriginal and Torres Strait Islander health training units and organisations.

Cultural Educators and Cultural Mentors will continue to thrive through collegiate and professional development support from their peer network and by the RACGP.

Aboriginal and Torres Strait Islander cultural safety training

The RACGP is committed to improving the health of Aboriginal and Torres Strait Islander peoples through the provision of culturally safe healthcare. To enable this, it is imperative that everyone involved in training can reflect on their own values, beliefs and cultural expectations of life and healthcare delivery, and how this influences their behaviours and practices. Understanding and respecting Aboriginal and Torres Strait Islander peoples, their cultures and values, and developing the skills to be culturally safe in the workplace, are essential to contributing to closing the gap in health between Aboriginal and Torres Strait Islander peoples and non-Indigenous Australians.

This is why the RACGP intends to develop a cultural safety and governance strategy in line with our Innovate RAP, which will include a framework for ensuring all RACGP staff, MEs, supervisors, practice managers and registrars undertake continuing professional development in cultural safety.

Activity	Provided by	Resources	Outcomes

Training in the ADF

Registrars in the Australian Defence Force (ADF) have a unique training experience. They must adhere to two training schedules, standards, and policies throughout their journey to Fellowship and during ADF deployments and transfers. Sometimes ADF and RACGP training requirements can conflict, putting the ADF registrar's capacity to meet the RACGP's requirements for Fellowship at risk.

Objectives

- Provide tailored support to ADF registrars to navigate their general practice training.
- Provide specific guidance to ADF registrars and the ADF to help registrars attain Fellowship.
- Alleviate the administrative and operational burden of managing this highly mobile group of registrars.
- Maintain the RACGP [Standards for general practice training](#).

Key initiatives

- Establish a virtual training region dedicated to ADF training.
- Remove ADF registrars from Department of Health placement KPIs.
- Policy exemptions specific to this cohort to provide flexibility while training.
- Mandatory civilian general practice training terms in GPT1 and GPT2.
- Written guidance for the registrar, ADF and RACGP staff to ensure all stakeholders understand this unique training context.

This strategy has been developed in line with extensive feedback received from the ADF, training organisations, censors, and registrars. The proposal will require liaison with ACRRM and the Department of Health to make ADF registrars supernumerary, which is feasible before January 2023. Other activities can be developed in line with existing transitional work.

Activity	Provided by	Resources	Outcomes
Manage ADF registrar training	<ul style="list-style-type: none"> • RACGP local • ADF virtual region 	<ul style="list-style-type: none"> • ADF liaison • ADF TC 	<ul style="list-style-type: none"> • The ADF registrar is allocated to the ADF virtual region • The ADF virtual region is in addition to the geographic regions and sits outside DoH and other regional placement KPIs • The ADF team manages the ADF registrar's training, including necessary documents and contextual factors, to provide continuity of support

Otherwise, deployment will be administered as Category 3 leave

Extended skills training

Registrars extend the depth and breadth of their training by undertaking an extended skills placement that is relevant to general practice and of demonstrated benefit to patients and the community. Extended skills placements enable registrars to increase their knowledge and skills in a specific area of practice. A maximum of six months' full-time equivalent training can be undertaken in a range of posts (single or in combination), including general practice, hospital, and non-clinical and community settings. The type of post is decided by the registrar in discussion with the ME.

Note: The extended skills term can be used to complete the rural generalist training – core emergency medicine training module, or be used flexibly to consolidate skills, as per the [position statement](#) published in March 2021.

Objectives

- There are posts offering extended skills training that meet training and community need.
- Registrars are aware of the extended skills training opportunities.
- Accreditation requirements are clear for different types of extended skills posts.

Process for a registrar to complete an extended skills post

Approval of an extended skills post will be required before a registrar commences in the post. Learning plan approval will be provided by the local ME. Consultation might be required with the relevant censor if there are contentious or challenging issues raised, particularly in relation to the scope of practice and relevance to general practice training. Other common issues relate to part-time training and training in non-clinical posts. The registrar will be responsible for developing their learning plan with help from their ME or supervisor, and the learning plan will include training outcomes and how these will be measured.

At the completion of the post, the registrar will reflect on their learning outcomes, including how their learning objectives were met. This could be by reviewing their learning plan and reflecting on the post, or by using a range of work-based assessment tools and completing an evaluation report.

Objectives

- Outline the approval process for extended skills training.
- Outline expectations of registrars in undertaking an extended skills post.
- Ensure that supervisors provide feedback on progress during the post.

Key points on extended skills training

- A national accreditation framework and accompanying processes will be established.
- Clear, consistent guidance on the requirements for accreditation of extended skills posts will be available.
- To improve consistency and quality of extended skills posts, evaluation and assessment templates and guidance documents will be developed.

The post-Fellowship recognition of specific interest areas can be linked to extended skills posts and the learning opportunities that they provide.

Consideration will need to be given to the overlap with ADF training and the approval of overseas extended skill placements.

Training in academic general practice

Training in research and evidence-based decision making

Basic research literacy and evidence-based decision-making are core skills for GPs, and training in these areas is required by the AMC (Standard 3.2.8). These skills include the ability to search, appraise and use evidence from the research literature for informing clinical practice. Training in research and evidence-based practice will be provided to all registrars. This will include training in research methodology, critical appraisal of literature, collection and use of scientific data, and evidence-based practice. Participation in research will also be promoted, as building research activity in general practice is a priority. Training and participation in research are also important for building registrar interest in academic general practice, where there is a current workforce shortage.

Education on conducting safe research in Aboriginal and Torres Strait Islander health settings will be included in general practice research training. This part of the curriculum will be led by Aboriginal and Torres Strait Islander peoples. Aboriginal and Torres Strait Islander registrars will be encouraged and supported to undertake research.

Objectives

- Education for registrars in research methods, critical appraisal of literature, scientific data and evidence-based practice is delivered.
- Registrars, MEs and GP supervisors build their research literacy.
- Research participation by registrars is increased.

Activity	Provided by	Resources	Outcomes
Develop and implement a research syllabus	<ul style="list-style-type: none"> • RACGP national • RACGP Expert Committee Research 	<ul style="list-style-type: none"> • RACGP curriculum and syllabus • RACGP Strategic Research Agenda • RTO syllabi • National Faculty of Aboriginal and Torres Strait Islander Health 	<ul style="list-style-type: none"> • There is an integrated syllabus for basic and extended research training for registrars that aligns with the RACGP's strategic research agenda • Aboriginal and Torres Strait Islander cultural safety and research values are addressed and met in the research syllabus

Medical education scholarship

Teaching junior colleagues and peers is an activity expected of GPs and registrars. The PLT program will include medical education as part of the syllabus for all registrars. Educational professional development for supervisors and MEs is detailed in the supervisor and ME professional development sections. Medical education as an extended skill can be gained through an academic post or as a registrar ME. Scholarship in medical education will be supported by regional journal clubs focusing on medical education. The PLT program also includes an educational research program, a key objective of which is to build scholarship in medical education. This is detailed in the Educational Research Grant program section.

Academic posts

Academic posts provide extended training to selected registrars in academic general practice. They are strongly supported by university departments of general practice and the RACGP. The purpose of academic posts is to expose registrars to academic general practice, to provide them with a means to develop academic skills and to enter into a career in academic general practice.

Objectives

- Every year, 20 registrars can undertake an academic post, which enables them to engage with the academic general practice (research and teaching) environment and develop extended skills in academic general practice.
- Relationships are built with university departments of general practice.

There will be no significant changes made to the Academic Post (AP) Program in the transition to PLT; however, the role currently undertaken by RTOs will be transferred to the RACGP regional teams. To ensure rural and remote registrars can participate in the AP Program, a model for remote university supervision will be developed. Networking will be encouraged among previous and current AP participants to share their experiences and learnings, and foster research mentor networks.

Activity	Provided by	Resources	Outcomes

PhD pathways

GPs have a lower rate of PhD study and completion than other specialist medical disciplines, and there is currently no formal PhD pathway for registrars. The PLT will provide opportunities for registrars to undertake PhD pathways during training. These pathways may include a modified academic post. RACGP national, regional, and local teams will support the implementation of an intercalated PhD pathway for registrars to undertake a PhD alongside their general practice training (fig 5). PhD pathways opportunities will be developed for Aboriginal and Torres Strait Islander registrars to increase PhD attainment rates by Aboriginal and Torres Strait Islander peoples where PhD completion rates are currently low. See the [Indigenous strategy annual report](#) for further information.

Objectives

- Intercalated PhD pathways are available for registrars to undertake general practice training and PhD requirements concurrently.
- Modified academic posts are created for registrars interested in completing a PhD.
- Registrars undertake PhD pathways.

Activity	Provided by	Resources	Outcomes
Develop PhD pathways that enable concurrent completion of RACGP Fellowship pathways	<ul style="list-style-type: none"> • RACGP national • RACGP Expert Committee research • RACGP Aboriginal and Torres Strait Islander faculty 		<ul style="list-style-type: none"> • Pathways exist to enable registrars to continue or commence a PhD candidacy during training • Training policies support an intercalated Fellowship/PhD pathways • Resources are sourced to support intercalated PhD pathways • Networks and relationships with universities are built to support intercalated PhD pathways
Advocacy and promotion of intercalated Fellowship /PhD pathways	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national • 	<ul style="list-style-type: none"> • Medical schools • Departments of GP 	<ul style="list-style-type: none"> • PhD pathway opportunities for urban, regional, and remote registrars and prospective registrars are promoted • PhD pathways for Aboriginal and Torres Strait Islander registrars and prospective registrars are promoted
Collaboration and Mentorship and support of registrars embarking on an intercalated pathway	<ul style="list-style-type: none"> • RACGP regional • RACGP national • Universities 	<ul style="list-style-type: none"> • Academic GPs • GPs with a PhD 	<ul style="list-style-type: none"> • There are designated university supervisors • There are designated GP academics within the RACGP ERU for support and mentorship • A network of academic GPs supports registrar PhD candidates

Figure 5: Intercalated PhD and PLT academic training

Progressive assessment

The RACGP progressive assessment framework spans from the selection of registrars into the program through to the Fellowship exams. The progressive assessment framework is currently being developed and refined with stakeholder input and guidance. This framework describes both high-stakes and low-stakes assessments. High stakes assessments include the barrier exams for final certification purposes. Low-stakes assessments primarily serve to provide feedback and guidance for registrar learning as they progress. The process of assessing candidates for selection is described in the Eligibility and Selection section of this document.

This section focuses on the assessment of learning that occurs during training, where there is an emphasis on gaining a clear understanding of the progress of each registrar towards Fellowship. This is important for providing registrars the feedback needed for self-reflection and learning guidance. It is also important for decisions on levels of supervision and scope of practice and the need for additional educational support. Assessment in the workplace is a key part of the program, as PLT is principally a work-based educational program where work-based performance is the prime outcome. There are no pass–fail decisions linked to any single assessment. Instead, a series of low-stakes assessments over time provide data on which to make decisions about progress. The work-based assessment component of the assessment framework will be built around work-based educational activities that already occur such as consultation observation, clinical notes review and case discussion. The aim is to frame much of what is already being done in a way that more effectively assesses progress. We do not intend to increase workload requirements of supervisors.

When a registrar enters their first general practice term, an initial assessment will be made to inform the level of supervision that the registrar requires. The aim is to ensure patient and registrar safety by informing the development of a supervision plan as detailed in the Supervisor and Support section. This initial assessment is to understand the registrar's experience and gain a sufficient view on the registrar's consulting skills to judge the level of supervisory oversight required. This is consistent with what supervisors currently do when registrars commence their first general practice placement.

The assessment framework will be structured according to the outcomes and indicators of the RACGP Curriculum, syllabus, and profile of a GP. The delivery of the program involves national, regional, and local teams.

Objectives

- Registrars are provided with feedback on their progress towards Fellowship.
- Feedback is regular, specific, and formative.
- Registrars are supported in engaging in self-reflection.
- The education team and registrar use the assessment results to inform and plan ongoing learning.
- The level of supervision is matched to the competence of the registrar.
- Satisfactory progress in the development of the required knowledge, skills and attitudes is determined.
- Registrars who need additional support are identified early.

There will be ongoing evaluation of all assessment activities. Refer to the Monitoring and evaluation section for further information.

Activity	Provided by	Resources	Outcomes
Safety assessment at commencement in general practice terms	<ul style="list-style-type: none"> Supervisors 	<ul style="list-style-type: none"> Supervisor safety assessment rubric IT platform GP competency framework 	<ul style="list-style-type: none"> The level of supervision is matched to the registrar's competence Registrars only undertake procedures and management of high-risk situations that they are trained for and are confirmed as competent to perform Assessment of registrar competence is based on observation of registrar practice

Assessment of Aboriginal and Torres Strait Islander health and cultural training

Providing support to review and develop evidence-based processes for teaching and learning assessment in the Aboriginal and Torres Strait Islander health training space needs to be considered, including a cultural competency framework and assessment guidance of general practice training in Aboriginal and Torres Strait Islander health. Cultural Educators and Cultural Mentors will play a crucial role in developing and delivering assessments, especially work-based assessments.

Activity	Provided by	Resources	Outcomes
Assessment of cultural safety and understanding in the Aboriginal and Torres Strait Islander health context	<ul style="list-style-type: none"> • RACGP national • RACGP Aboriginal and Torres Strait Islander Health Faculty • Cultural Educators and Cultural Mentors Network 	<ul style="list-style-type: none"> • RACGP assessment program including WBA 	<ul style="list-style-type: none"> • All RACGP assessments from selection through to Fellowship assess Aboriginal and Torres Strait Islander health, cultural safety and cultural learning and understanding • Cultural Educators and Cultural Mentors are involved in registrar assessment – particularly WBAs • Registrar assessment appropriately incorporates Aboriginal and Torres Strait Islander patient feedback

Part three: Medical education, supervision, training sites and placements

Supervisor support and expectations

Work-based training under supervision is the basis of PLT. Community general practice training sites provide the work environment for the core of PLT training, and the GP supervisor and supervisory team are essential to this training. RACGP recognises that the high quality of AGPT is largely based on the current commitment and skilled training provided by supervisors. PLT needs the ongoing engagement and commitment of these supervisors. RACGP is committed to ensuring the change to PLT is manageable for supervisors and that the experience of supervising a registrar is rewarding. The activities detailed in this section intend to streamline supervisor support and expectations and aim to reflect the realities of hosting a registrar within a practice. The local team structure of PLT will ensure that supervisors and practices engage with known medical educators (MEs) and training coordinators (TCs) with whom they will have multiple points of engagement for a broad range of training program activities. Supervisor Liaison Officers will remain an important position in PLT for supervisor support, advocacy, and representation.

RACGP views training sites as educational organisations and understands that registrar training is usually undertaken by a supervisory team. Aligned with the RACGP training standards, each general practice training site will have at least one lead GP supervisor. Lead supervisors are responsible for ensuring the registrar receives the clinical and educational supervision required to meet the [RACGP Standards for general practice training](#). The Lead supervisor is responsible for coordinating the team to ensure that all tasks are covered. The supervision team can include GPs, nurses, Cultural Mentors and other health workers.

The lead supervisor(s) together with the supervision team support the education and development of registrars while ensuring safe patient care. Three documents will be used to frame these tasks: a clinical supervision plan; an in-practice teaching plan; and a supervision team professional development plan. These plans will be appropriate to the practice context and to the registrars placed at the practice. The plans are living documents that can be adjusted throughout the training term in response to the development of the registrar, and in response to changing circumstances in the practice. This approach recognises that every practice has different training assets and needs.

Lead supervisors have designated PD support and expectations which are detailed below. The supervisory team may include other GPs accredited as clinical supervisors whose primary role is to support the supervision of the registrar. They may be involved in other registrar educational activities depending on the practice teaching plan. Practices require enough accredited supervisors to ensure that there is always a GP supervisor (lead or non-lead) available for escalation of supervision issues. Accreditation as a clinical supervisor is less onerous with less PD expectation than accreditation as a lead supervisor.

It is recognised that the PLT model represents a change for some supervisors and practices. This change will be implemented over time in a way that does not add additional burden to the practices and supervisors. The model of the supervisory team represents what happens in most practices, and the emphasis on delivering supervisory team professional development in the practices is intended to ensure that supervisor professional development is relevant to their educational practice and is less onerous.

Supervisor accreditation and professional development will be undertaken in collaboration with ACRRM.

Objectives

- Effective supervision of registrars is in place at all training sites.
- Intra-practice learning environments are conducive to registrar education, while ensuring safe patient care.
- Self-supporting supervisory teams are established in training sites.

- Supervisors are committed to safe registrar practice and registrar progress.
- Being a supervisor is attractive and fulfilling.
- Supervisors understand GP supervision requirements.
- Supervisors have the knowledge and skills to provide effective supervision.
- Supervisors are engaged with a broad community of supervisors.
- Supervisors undertake ongoing professional development.
- Accreditation and professional development requirements are not unduly onerous for supervisors.

Supervisor recruitment, selection and accreditation

All supervisor accreditation at transition will be recognised.

Supervision, teaching and professional development plans

The delivery of in-practice supervision and teaching is specific to each training site and registrar. How this is to happen will be articulated in training site specific supervision and teaching plans that are revised as the registrar progresses. Many practices already have the basis of such plans. Supervision and teaching plans are also relevant for practice profiles and marketing practices to prospective registrars.

The professional development is relevant and specific to the needs of each supervisor and their team. To ensure that PD needs are addressed, each lead supervisor and their team will craft their own PD plan. This will be supported by the local ME and TC and be resourced by the PLT program. RACGP will facilitate recognition for CPD points for these PD plans.

Supervisor professional development plans will be instituted over an accreditation cycle and therefore are not required to be in place on day one of PLT.

Activity	Provided by	Resources	Outcomes
Creation and maintenance of a documented supervision plan	<ul style="list-style-type: none"> Lead supervisor RACGP local 	<ul style="list-style-type: none"> Supervision plan template – the ‘who, how, when and why’ of calling for help Supervisory team agreement template RACGP Standards for general practice training 	<ul style="list-style-type: none"> Each practice has a supervision plan that details the supervisory expectations and structures for each registrar. Cultural education for supervisors and practices

Supervisor and practice site cultural competency is important for Aboriginal and Torres Strait Islander cultural safety and for building registrar cultural competency.

Activity	Provided by	Resources	Outcomes
Cultural safety education and mentorship for GP supervisors, supervisory teams, and training sites	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national • Cultural Educators and Mentors 	<ul style="list-style-type: none"> • Aboriginal and Torres Strait Islander cultural and health education framework • National supervisor curriculum cultural awareness and safety modules both online and face-to-face 	<ul style="list-style-type: none"> • Lead supervisors have undertaken cultural awareness and safety training • Cultural safety training is included in PD plans for GP supervisors, supervisory teams, and training sites • Cultural safety training and mentorship is delivered by local cultural educators and mentors

Supervisor and supervisory team evaluation, feedback and performance management

The RACGP evaluation framework will provide for evaluation of supervisor and supervisory team activities. This evaluation will be used for feedback to supervisors, supervisory teams, and practices for quality improvement. It will also be used to ensure that training standards are being met and guide corrective action where this is not the case. Significant underperformance that persists despite corrective action will impact placement and reaccreditation decisions and may result in removal of status as a supervisor or training site.

Remote supervision

Many rural and remote locations have limited or no onsite supervisor available, and there may also be limited or intermittent medical services. Placing registrars in these sites can, none-the-less, provide excellent training opportunities while also helping to address current and future medical workforce needs.

The RACGP is developing a remote supervision model for registrars working in practices where there is limited or no onsite supervisor available. The model will provide the structures and resourcing necessary to achieve training excellence and safety in remotely supervised placements.

This section proposes a program to establish, maintain and support training placements that require remote supervision.

Objectives

- Establish a program for registrars to be placed in remote or isolated sites where there is a training and workforce need that requires partial or full offsite supervision.
- Ensure that remotely supervised placements protect the safety of patients, the registrar, and the practice.
- Ensure that remote supervision arrangements are:
 - feasible, sustainable, resource efficient and sufficiently financed
 - acceptable and attractive to the registrar, practice, and supervisors
 - educationally sound

Activity	Provided by	Resources	Outcomes

Training site support and management

Training sites are where the primary curriculum for PLT is delivered. RACGP recognises the commitment and training undertaken by the training sites currently engaged by the RTOs. It is critical for the future of GP training that these training sites continue to host registrars following the transition to PLT. RACGP is committed to ensuring that this transition causes minimal disruption to training sites. PLT will support training sites in providing a high-quality educational environment for the registrars. It will also support training sites in their responsibility in ensuring patient and registrar safety.

Throughout their training, registrars deliver clinical services. In doing so, registrars make up an important component of the general practice medical workforce, particularly in areas of workforce need. PLT has contractual and social responsibilities to ensure that registrar placements are distributed in a way that contributes to addressing workforce imperatives. PLT will do this in three ways. The first is building training capability in areas of workforce need. The second is investing in ensuring that placements in areas of workforce need provide the quality training required for these placements to be attractive to registrars. The third is managing the overall distribution of training sites so that there is not an excess of training sites in areas of low workforce need. Encouraging and enabling registrars to work in areas of workforce need is also addressed through pipeline case management and priority placements. These initiatives are described further in the Training pipelines, Supporting registrars, and Placements sections.

It is important that each site has a supervision plan, teaching plan and professional development plan for supervisors. These plans make visible the supervision, teaching and supervisor PD for each training site. This is important for guiding registrars and supervisors and for ensuring adequate resourcing of each site. They also provide a means of marketing training sites to prospective registrars. These plans are detailed in the Supervisor requirements, management and support section.

For training sites that host registrars from both RACGP and ACRRM, training sites will be supported and managed collaboratively by the two colleges.

Objectives

- Training sites meet AMC and RACGP accreditation standards, particularly with regard to registrar safety, patient safety and quality training.
- The RACGP national accreditation framework is implemented.
- Training sites are culturally safe.
- High-quality training capacity is developed in areas of training need.
- Training site distribution supports placing registrars in areas of workforce need.
- Communities are engaged in building local training capacity, especially in Aboriginal and Torres Strait Islander medical services.

Training capacity planning

Activity	Provided by	Resources	Outcomes
GP workforce needs analysis	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • Qualitative and quantitative information • HeaDS UPP data • Community profiling tool • Medical workforce information • Workforce needs data collected by other organisations – particularly PHNs, RWAs, and training organisations. 	<ul style="list-style-type: none"> • There is clear identification of areas of GP workforce need including: <ul style="list-style-type: none"> - rural and remote communities - Aboriginal and Torres Strait Islander health - underserved communities - mapping of GP workforce needs against current training placements • Areas of workforce need that can be addressed by training are identified
Audit of potential training sites	<ul style="list-style-type: none"> • RACGP regional • RACGP local • RACGP national 	<ul style="list-style-type: none"> • HeaDS UPP, PHN, AGPAL and GPA data • Local knowledge 	<ul style="list-style-type: none"> • Potential training sites are identified • Unused training capacity in current training sites is identified • There are clear linkages with AGPAL and GPA to enable recruitment of new posts

Training site accreditation

Training site accreditation requirements and processes are currently being developed with ACRRM, building on the current processes. The aim is to ensure that these are fit for purpose, transparent and as streamlined as possible. RACGP is developing its own national accreditation framework. This will include training site KPIs.

Activity	Provided by	Resources	Outcomes
Accreditation governance and coordination	<ul style="list-style-type: none"> RACGP national 	<ul style="list-style-type: none"> National Accreditation Framework Accreditor training program AMC and RACGP training and training site standards 	<ul style="list-style-type: none"> A bi-college approach to accreditation is taken Accreditation is coordinated with AGPAL/GPA/prevocational training accreditation to reduce administrative burden for practices There are clear and transparent accreditation requirements, quality indicators and processes Accreditation policy and guidelines include cultural safety requirement and specific requirements for supervision, mentorship, orientation, and training in Aboriginal and Torres Strait Islander contexts
Site accreditation and reaccreditation	<ul style="list-style-type: none"> RACGP local RACGP regional 	<ul style="list-style-type: none"> Accreditation Toolbox Teaching plan proforma Supervision plan proforma Supervisory team PD plan proforma 	<ul style="list-style-type: none"> There is regional oversight of training site accreditation and reaccreditation Conflicts of interest are addressed in accreditation processes Accreditation includes a two-way feedback discussion between the practice, its supervision team and the local ME and TC The practice supervision plan, teaching plan and supervisory team PD plan are used for accreditation discussions and decisions Training site accreditation is aligned with supervisor accreditation
Practice performance support and management	<ul style="list-style-type: none"> RACGP local RACGP regional 	<ul style="list-style-type: none"> Accreditation Toolbox RACGP Standards for general practice training Intra-practice supervision, teaching and PD plans Critical incident reporting process Registrar feedback processes 	<ul style="list-style-type: none"> Stretch goals are used The practice supervision plan, teaching plan and intra-practice supervisory team PD plan are used to support performance management Maintenance of accreditation standards is monitored through RACGP local support contacts, registrar feedback and monitoring of red flags including identified critical incidents Where concerns about practice performance are raised, principles of natural justice, transparency and right of reply are applied

Activity	Provided by	Resources	Outcomes
			<ul style="list-style-type: none"> • There is focused support for practices where issues are identified • Practices are de-accredited when they are unable to meet training standards despite support

Accrediting extended skills posts

Extended skills training sites are accredited and approved in accordance with the RACGP [Standards for general practice training](#). Accredited extended skills posts satisfy the requirements set out in the [Vocational Training Pathway – Requirements for Fellowship Policy](#), and offer planned training that is referenced or linked to a relevant curriculum, with clear outcomes and a clear indication of how the registrar will be supported. Each post must have a designated supervisor with relevant skills.

The accreditation of some posts can be challenging, especially when there are no standards against which to measure the post. An example of this is extended skills posts in skin cancer clinics which are not accredited to the RACGP practice standards. A national accreditation framework and accompanying processes are being developed to guide the accreditation of extended skills training sites. Requirements will include the specific needs of the site and discipline, the supervisor's skills and qualifications, teaching plans, support, supervision, assessment and term evaluation.

Activity	Provided by	Resources	Outcomes
Identification of suitable extended skills posts	<ul style="list-style-type: none"> • RACGP regional 	<ul style="list-style-type: none"> • Accreditation team 	<ul style="list-style-type: none"> • Posts are identified and contacted to inform about requirements and process for accreditation
Promotion of extended skills posts to registrars and prevocational doctors	<ul style="list-style-type: none"> • RACGP regional 	<ul style="list-style-type: none"> • Profile of extended skills posts • Marketing team 	<ul style="list-style-type: none"> • Information about extended skills posts is available through the website, at orientation, hospital careers sessions, etc. • Up-to-date lists of training sites are maintained • Current and potential registrars have access to the list of accredited hospital posts, training sites, and extended skills posts
Approval of hospital posts holding accreditation by relevant authority	<ul style="list-style-type: none"> • RACGP regional • RACGP National • Relevant jurisdiction. 	<ul style="list-style-type: none"> • Accreditation team 	<ul style="list-style-type: none"> • Extended skills posts that are not in general practice are accredited by the body appropriate to the skill • There are designated supervisors experienced in the scope of practice being offered • There are a site-specific supervision and teaching plans aligned with the RACGP curriculum for the area of practice • Guidance on application timing and process is provided

Activity	Provided by	Resources	Outcomes
Approval of non-hospital, non-GP posts	• RACGP regional	• Accreditation team	<ul style="list-style-type: none"> • There is a clear outline of learning outcomes to be achieved from a placement at the post • Guidance on application timing and process is provided
Accreditation application assessment and visit to post by team	• RACGP regional	<ul style="list-style-type: none"> • Accreditation report • RACGP Standards for general practice training • Accreditation team 	<ul style="list-style-type: none"> • The supervisor provides the proposed supervision and teaching arrangements for the post • Clear outline of expected outcomes is provided • Extended skills posts have evidence of accreditation by the relevant authority, processes for registrar support and supervision, a curriculum and/or teaching plan, and orientation to the post
Re-accreditation of posts	• RACGP regional	<ul style="list-style-type: none"> • Re-accreditation application from post and report • Feedback from registrars in the post (feedback form) 	<ul style="list-style-type: none"> • Post arrangements are reviewed • Feedback and recommendations from registrars and supervisors inform the review, quality improvements and reaccreditation process

Training site and practice manager support and training

Training site and practice manager support will primarily be provided by the local medical educator and training coordinator team and by a dedicated regional practice liaison officer.

Activity	Provided by	Resources	Outcomes
Facilitating training site networking	<ul style="list-style-type: none"> • RACGP local • RACGP regional 	<ul style="list-style-type: none"> • Online platforms 	<ul style="list-style-type: none"> • Regular peer meetings are held for local practice managers

Engaging and supporting Aboriginal and Torres Strait Islander health placements

Aboriginal and Torres Strait Islander health training sites provide a unique experience for registrars that cannot be gained in a mainstream general practice. The structure and delivery of Aboriginal and Torres Strait Islander cultural and health training has been well established in terms of partnerships with the ACCHOs and AMS local communities and individuals. An Aboriginal and Torres Strait Islander health training site will be characterised by governance input from the local Aboriginal and Torres Strait Islander community and supported by RACGP.

Activity	Provided by	Resources	Outcomes
Strengthen existing and establishing new Aboriginal and Torres Strait Islander health placements	<ul style="list-style-type: none"> RACGP local RACGP regional 	<ul style="list-style-type: none"> AMSs/ACCHOs Community engagement and partnership strategy RACGP Innovate RAP RACGP Cultural Safety and Governance Strategy Strategic Plan Program Funding Salary Support Program Funding Workforce modelling - HeaDS UPP National accreditation framework Practice management diploma for ACCHO staff 	<ul style="list-style-type: none"> Accessible Aboriginal and Torres Strait Islander health training placements for registrars Placements are: <ul style="list-style-type: none"> community and service driven culturally appropriate supported and safe contributing to current and future workforce needs in Aboriginal and Torres Strait Islander health delivery accredited

Providing AMSs/ ACCHOs information about GP training	<ul style="list-style-type: none"> • RACGP regional • RACGP national • Faculty Aboriginal and Torres Strait Islander Health 	<ul style="list-style-type: none"> • Community engagement and partnership strategy • RACGP Cultural Safety and Governance Strategy • National Aboriginal and Torres Strait Islander cultural and health education framework 	<ul style="list-style-type: none"> • Increased understanding of the GP training program and expectations by AMSs and ACCHOs • Clarity across the sector on how Aboriginal and Torres Strait Islander health and cultural training fits within PLT
Supporting comprehensive and multidisciplinary in-practice education in Aboriginal and Torres Strait Islander culture and health	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national • Supervisors • Cultural mentors • Cultural educators 	<ul style="list-style-type: none"> • Aboriginal and Torres Strait Islander health practitioners and other staff • National Aboriginal and Torres Strait Islander cultural and health education framework 	<ul style="list-style-type: none"> • There are multidisciplinary teaching and learning opportunities including: <ul style="list-style-type: none"> - working in teams - working with Aboriginal and Torres Strait Islander health practitioners and other health workers - engaging with community-based services - undertaking local cultural activities

Placements

Registrar placements at training sites serve two purposes. The first is to provide registrars with training experiences that will fulfill their training requirements. The second is to ensure registrars are distributed in a way that addresses workforce distribution needs. Placement distribution must meet Department of Health contract requirements. Placement design will be done in collaboration with ACRRM to ensure efficient and equitable placement of registrars, regardless of which college training program they are undertaking.

The placement process will take place over several rounds. There will be an initial round of targeted priority placements, followed by a round of placements for most of the registrar cohort. Placement will consider registrar preferences, training site preferences and distribution requirements.

Objectives

- Both training and workforce needs are met through the placement process.
- Placement processes are nationally consistent, transparent, and fair.
- Expectations of registrars and practices are aligned to national workforce needs.
- Transfers between regions and pathways are transparent and align with distribution targets and training needs.

Key points on placement

- Priority placements are identified and filled according to both training and workforce needs.
- Registrars and placement sites are case managed to align expectations with placement outcomes.
- Policy and program flexibility will enable transfers between regions and pathways to meet distribution targets and training needs.
- Whilst the DoH and its delegated entity will direct placement priorities, the PLT placement process will take into consideration the preferences of registrars, training sites and supervisors in the matching and allocation process.

Activity	Provided by	Resources	Outcomes
Identify placement need and placement availability	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • Training management system <ul style="list-style-type: none"> - cohort analytics - placement analytics • Training portfolio • DoH KPIs • Identified areas of workforce need • RGCUs 	<p>At the completion of this activity, the following are identified:</p> <ul style="list-style-type: none"> • The required need and distribution of placements • Placement availability • Priority placements including: <ul style="list-style-type: none"> - RG required placements - Aboriginal and Torres Strait Islander health service placements - Placements in areas of workforce need - Training placements required for particular registrars on designated training pipelines

Activity	Provided by	Resources	Outcomes
			<ul style="list-style-type: none"> - Training placements for registrars with other priority training needs e.g., remediation

Supporting medical educators

MEs are key to the development, maintenance, and delivery of the PLT education program. The transition to PLT will require the RACGP to take on the employment of the ME workforce currently employed by the RTOs. This will require defining recruitment processes, employment structures, working conditions, and career pathways. RACGP will support ME skills maintenance and development through transition. It is recognised that transition will bring a change in roles and scope of activities for some MEs.

Active recruitment and support of Aboriginal and Torres Strait Islander GPs into medical education will be critical to building capacity for Aboriginal and Torres Strait Islander training.

The RACGP has a Medical Education Specific Interest Group with over 2000 members. The specific interest group provides the means of a voice for medical educators and a means for their support. It is also an avenue for building medical educator workforce capacity.

Objectives

- Establish a functional, supportive, and efficient RACGP ME organisational structure and culture to enable PLT delivery.
- Develop industry-specific standards for employment of MEs, including minimum skill sets, pay scales and professional development support.
- Recruit and retain a ME workforce adequate for PLT development and delivery, including establishing clear career advancement pathways.
- Develop resources for, and deliver, ME induction and ongoing professional development, including leadership training.
- Design structures and activities that will enable a culture of pastoral and collegiate support for MEs.

Recruiting medical educators

Education Research Grant program

The Education Research Grant (ERG) program enables an educational research program to be an integral part of PLT. The research undertaken will be driven by educational need, and research outputs will inform educational practice. The ERG program research activities will be undertaken where general practice vocational training activity is conducted. It will align with the [RACGP Research Strategy](#) and foster linkages with universities and other external stakeholders involved in medical education. It will provide opportunities for early career GP researchers, MEs and registrars to become involved in medical education research. It will have an important role in building general practice research capacity.

Objectives

- Produce high-quality education research evidence for general practice training in Australia.
- Increase research capacity and literacy within general practice, particularly among regional educators, supervisors, registrars, and practices.
- Promote a culture of academic critique and the use of evidence in general practice training.
- Facilitate the development of relationships between the RACGP, regional programs, educators, supervisors, registrars, practices, and universities.
- Promote and support the dissemination and translation of Australian general practice education research for use in general practice training.

Key points on the ERG program

- A research agenda will be developed for each ERG funding round in consultation with internal and external training stakeholders.
- An expression of interest process will precede the invitation to apply for grants.
- There will be flexibility in timelines and budgets depending on the research project.
- Emphasis will be placed on building research capacity, building research networks, and disseminating findings, including translation into medical education practice.
- These developments have been informed by the recent evaluation of the ERG program undertaken by the RACGP evaluation team.

Managing grants

Activity	Provided by	Resources	Outcomes
Creating a research agenda for the round	<ul style="list-style-type: none"> • RACGP National • RACGP Regional 	<ul style="list-style-type: none"> • RACGP ERG expert panel with representation from key stakeholders • University Departments of general practice • RACGP internal divisions and committees responsible for education • Department of Health research priorities • RACGP Expert Committee - Research 	<ul style="list-style-type: none"> • A research agenda for the round is determined by the RACGP ERG expert panel based on important educational problems relevant to general practice training • Annual review of the research agenda by the RACGP ERG expert panel
Allocation of Educational Research Grants	<ul style="list-style-type: none"> • RACGP national 	<ul style="list-style-type: none"> • ERG funding 	<ul style="list-style-type: none"> • There will be two models for the allocation, development, management, and delivery of ERGs: <ul style="list-style-type: none"> - a regional model similar to the current RTO-led ERG process - a national model will be piloted in 2022 for a smaller number of ERGs termed RACGP-sector collaborations (RSCs), and iteratively modified • The regional model: Expressions of interest will be invited from regional teams to deliver research projects which align with DOH priorities and the research agenda for the round. Based on the quality of their EOI, a number of regional teams will be invited to submit a full research proposal • The national model: A senior education researcher and a research assistant will be recruited to lead the development, management, coordination, and delivery of RSC education research projects which have been determined by the RACGP ERG expert panel. They will partner collaboratively with regional teams and Departments of General Practice, and recruit additional expertise as needed for the successful delivery of the projects • Budget and timeline allocations for the national RSC projects are based on the research problem, the proposed methods and the scope and likely impact of the research

Part four: Program governance and management

Education program governance

The governance structures and processes for the PLT education program are currently being determined as a matter of priority. The RACGP Board has ultimate ownership of, and responsibility for, the PLT education program.

Objectives

- Ensure clear lines of responsibility and accountability through to the RACGP Board.
- Define the objectives of the PLT education program (as described in the Introduction) and ensure their fulfilment.
- Maintain accreditation with the AMC.
- Ensure that the PLT education program aligns with the RACGP educational framework.
- Align the PLT education program with the [RACGP strategic plan](#).
- Ensure the RACGP [Standards for general practice training](#) are met.
- Ensure the Education policy framework is fit for purpose.
- Address Aboriginal and Torres Strait Islander cultural and health concerns.
- Ensure accountability, authority and decision-making are clearly articulated within a delegations framework and ensure compliance with that framework.
- Ensure that PLT meets its objectives and key performance indicators – both educational and workforce.
- Manage PLT effectively and efficiently.
- Ensure the financial integrity of the training program.
- Ensure that the PLT education program risks are managed within an appropriate risk appetite.
- Ensure the governance of the PLT education program is transparent, fair, equitable and responsive to input from both internal and external stakeholders.
- The principles underpinning the management of grievances and complaints are clearly articulated.
- Systems are in place to determine access to sensitive information.

Stakeholder management

General practice training involves many stakeholders. The discipline has broad scope, many varied contexts and interfaces with many other health delivery and training organisations. There are also multiple funding streams. It is a key endeavour of PLT to engage with key stakeholders and to navigate their priorities to achieve the goal of quality training and improved health outcomes.

For two decades, general practice training has been delivered by Regional Training Providers and then RTOs, funded by the Federal Government. Program staff at RTOs have highly developed expertise in delivering vocational training and in supporting registrars throughout their training journey, particularly in the regional context. They also have established relationships with key stakeholders within their region. The involvement of RTOs and their staff in the transition to PLT will be essential for the future of GP training. The expertise and stakeholder connections currently held by RTOs will be required to successfully deliver PLT.

Current RTO staff are strongly committed to the work of GP training. It will be critical that they be engaged meaningfully in the transition process. Throughout transition, there will be frequent, clear, and consistent communication with the RTOs, including an expressed desire to preserve their staff and continue building on the work they have done.

Objectives

- To engage key external and internal stakeholders in the development of, and transition to, PLT.
- To preserve and build on the educational and operational expertise of RTOs and other stakeholders.
- To preserve key stakeholder relationships currently held by RTOs.

Key points on engaging and managing training stakeholders

- A strong commitment to clear and consistent communication with RTOs and other internal and external stakeholders.
- Recruitment of internal and external expertise for PLT transition and operationalisation.
- Engagement with stakeholders for alignment of priorities and securing common goals.
- Proactive change management undertaken collaboratively with both internal and external stakeholders.

Activity	Provided by	Resources	Outcomes

Marketing

Promoting GP and rural generalist careers

The promotion of general practice and rural generalist careers is important for increasing interest in general practice training and is therefore a key priority for the RACGP. A marketing framework will be established to support this. This will be built on effective marketing approaches already in use by RTOs and the RACGP, with oversight from the RACGP Strategic marketing and communications division. This framework will guide marketing at national, regional, and local levels, and ensure that general practice and rural generalist training is marketed consistently and efficiently, while also being relevant to each training context. It will ensure that PLT marketing aligns with RACGP's promotion of the profession. Marketing will be supported by PLT's case management approach, where prospective applicants are connected with champions for the profession.

Objectives

- PLT marketing is coordinated under a national marketing framework based on effective RTO and RACGP marketing initiatives.
- Marketing messaging is consistent, effective and aligns with the RACGP's marketing of the profession.
- Marketing activities support case management of prospective candidates.
- PLT marketing is coordinated with marketing by other organisations with common marketing goals.

Activity	Provided by	Resources	Outcomes
Develop the PLT marketing framework	<ul style="list-style-type: none"> • RACGP national 	<ul style="list-style-type: none"> • RACGP marketing and communications division • RTO marketing expertise and guidelines • Medical Board of Australia marketing guidelines 	<ul style="list-style-type: none"> • The marketing framework provides a consistent and effective approach to marketing with flexible application to suit local contexts
Develop advertising content – national & local	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • RACGP Rural Faculty • RACGP Aboriginal and Torres Strait Islander Health Faculty • RACGP staff and members • GP research • PLT marketing framework • AHPRA Standards 	<ul style="list-style-type: none"> • Key messages are developed to promote general practice as a career of choice, with: <ul style="list-style-type: none"> - specific campaign pathway messages - region specific content - content specific for CALD groups, Aboriginal and Torres Strait Islander people and gender diverse groups
Determine advertising channels	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • Advertising organisations/ stakeholders • PLT marketing framework • GPiT Faculty • National Faculty of Aboriginal and Torres Strait Islander Health • RACGP Specific Interests Faculty 	<ul style="list-style-type: none"> • The College uses various suitable channels (such as social media platforms, publications, events, and organisations) to advertise PLT education program and general practice as a profession of choice

Advertise/promote other pathways alongside PLT for those not eligible for PLT but interested in general practice career	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • PLT marketing framework • Marketing material for other pathways 	<ul style="list-style-type: none"> • Promotion of other RACGP pathway options outside of AGPT for potential GP applicants not eligible for PLT
Recruitment/marketing to Aboriginal and Torres Strait Islander applicants	<ul style="list-style-type: none"> • RACGP national 	<ul style="list-style-type: none"> • RACGP Aboriginal and Torres Strait Islander Health Faculty • Aboriginal and Torres Strait Islander organisations: <ul style="list-style-type: none"> - IGPRN - AIDA - NACCHO and affiliates - Aboriginal Land Councils • Content specific for Aboriginal and Torres Strait Islander people 	<ul style="list-style-type: none"> • Partnerships with IGPRN, AIDA, IAHA, NAATSIHWP, CATSINaM and other peak Aboriginal and Torres Strait Islander health organisations to promote this in an effective and sustainable way

Events

See training pipelines section.

Sponsorships

The RACGP will conduct a range of sponsorship activities through existing and new relationships with external organisations. The national marketing framework will guide these activities with input from regional and local teams. Sponsorship activities will increase the profile of the RACGP and PLT, as well as promoting engagement and relationship building with other stakeholders.

Sponsorship activities will align with the RACGP values, mission, and goals, as articulated in the marketing framework. The national marketing framework will ensure a consistent and flexible approach to sponsorship, which is contextually relevant at regional and local levels.

Activity	Provided by	Resources	Outcomes
Develop event sponsorship criteria	<ul style="list-style-type: none"> • RACGP Rural Faculty • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • GP-related events • PLT marketing framework 	<ul style="list-style-type: none"> • There are clear criteria for event sponsorship • RACGP sponsorships align with RACGP mission, vision and goals and are relevant for the GP sector and GP training
Determine conference representation	<ul style="list-style-type: none"> • RACGP Rural Faculty • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • PLT marketing framework • RACGP Aboriginal and Torres Strait Islander Health Faculty 	<ul style="list-style-type: none"> • There is appropriate representation at conferences or sponsorship events • Speakers present at relevant conferences
Merchandise and collateral development	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • PLT marketing framework • Merchandise company • RACGP Rural Faculty • RACGP Aboriginal and Torres Strait Islander Health Faculty 	<ul style="list-style-type: none"> • Depending on the sponsorship entitlement or event, appropriate merchandise is distributed

Collaboration Opportunities

Collaboration with other relevant health service and educational organisations is important for efficiency and for reaching important audiences.

Key points on collaboration opportunities

- The RACGP regional teams will draw on relationships with regional and local organisations to achieve effective marketing with key audiences. These organisations include universities, hospitals, regional training hubs, Primary Health Networks, ACCHOs and AMSs.
- The RACGP regional teams will also link prospective general practice and rural generalist applicants with RACGP teams that provide case management and support.

Activity	Provided by	Resources	Outcomes
Develop stakeholder collaboration criteria	<ul style="list-style-type: none"> • RACGP regional • RACGP national 	<ul style="list-style-type: none"> • GP related events • PLT marketing framework • RACGP Rural Faculty • RTOs 	<ul style="list-style-type: none"> • There are clear criteria for determining suitable collaborations that align with GP training and PLT priorities
Engage with relevant organisations to establish marketing collaboration arrangements	<ul style="list-style-type: none"> • RACGP local • RACGP regional • RACGP national • RACGP Rural Faculty 	<ul style="list-style-type: none"> • PLT marketing framework • Collaboration criteria 	<ul style="list-style-type: none"> • Marketing collaboration opportunities are identified and arranged

Monitoring and evaluation

Monitoring and evaluation is fundamental to quality assurance and improvement. PLT will have an embedded monitoring and evaluation program. A national approach to evaluation and monitoring will provide efficiencies and ensure that key objectives are met. A national evaluation framework will be used by PLT to guide and support best-practice approaches to GP education and training across Australia. It will inform all levels of program activity by all stakeholders.

The PLT monitoring and evaluation framework is being developed and is based on the existing RACGP evaluation framework. A PLT Evaluation Reference Group will be established to inform this work. The reference group will draw on the existing membership of the RTO-based National Quality and Evaluation Network and other key bodies. The framework will inform both the transition and implementation phases and will be implemented by the RACGP National Evaluation Team with support from regional evaluation staff. Efficiencies will be possible through recruitment of some regional staff with evaluation expertise.

Objectives

- Support PLT program management in achieving its objectives, performance indicators and accountabilities.
- Develop and implement a national PLT monitoring and evaluation framework.
- Develop and implement a national approach to in- and out-of-practice education monitoring and evaluation.
- Provide a valid and reliable evidence base to understand results from PLT and inform continuous improvement.
- Involve registrars, supervisors, practice managers, medical educators and program staff in monitoring and evaluating the PLT program.
- Provide evidence for future innovations to the PLT program.

Key points on evaluation

- A PLT Evaluation Reference Group will advise on the development of a PLT monitoring and evaluation framework.
- The PLT monitoring and evaluation framework will cover:
 - monitoring – ongoing systematic collection and analysis of data on processes, outputs and outcomes (short, medium and long term) to monitor program and project progress against stated goals and objectives
 - evaluation – analysis of results in key areas of interest and prospective assessment of short-, medium- and long-term program impacts, both intended and unintended. Identify explanatory factors that can be addressed for program improvement
 - informing practice – feedback to supervisors, practice sites, medical educators and program staff in a way that affirms effective practice and gives direction for improvement of practice
- A PLT National Evaluation Team will implement the framework and related activities, supported by regional expertise, including collation of local data.
- There will be clearly defined monitoring and evaluation synergies, information exchange and efficiencies across all education program components.
- Monitoring and evaluation activities will be aligned across the PLT transition phase (pre-2023) and the implementation stage (2023 and beyond).

Risk management

Risk management entails systematic identification, review and mitigation of hazards that could impair effective and safe program delivery and compromise the meeting of key performance requirements. Regular evaluation of the program will inform risk monitoring and the improvement of risk-mitigation initiatives. Clear risk-management pathways also underpin the safety of all stakeholders, including patients, registrars, supervisors, practices, educators and the RACGP as a whole. They also provide a foundation for improvement and innovation.

Objectives

- Identify and address program risks via systematic risk-management processes.
- Engage with key stakeholders to support the identification of risks and develop and implement mitigation strategies.
- Monitor and evaluate critical incidents and adverse events to identify trends to inform program improvement.
- Ensure reconsideration and appeals processes are transparent, accessible, fair, and reliable.

Glossary and acronyms

Glossary

Aboriginal and Torres Strait Islander peak and jurisdictional organisations	<p>Aboriginal and Torres Strait Islander peak organisations refers to organisations that represent the national interests of their membership such as, NACCHO, AIDA, IGPRN, CATSINaM, NAATSIHWP, IAHA, Lowitja institute etc.</p> <p>Aboriginal and Torres Strait Islander jurisdictional organisations refers to state and territory representative organisations such as the NACCHO affiliates and/or regional and local organisations including local ACCHOs/AMs that support the interest of their membership and/or serve in their specific geographical regions and communities</p>
Clinical supervisor	Clinical supervisor is a specialist GP accredited to provide clinical supervision for registrars in the practice. They support the Lead supervisor and ensure the practice always has an accredited supervisor available to whom a registrar's need for assistance can be escalated. Accreditation as a clinical supervisor is significantly less onerous than accreditation as a lead supervisor.
Case management	A relationship-based, longitudinal, and contextually adapted approach to training support for registrars, supervisors and training sites.
Cultural awareness	<p>Cultural awareness is sensitivity to the similarities and differences that exist between two different cultures and the use of this sensitivity in effective communication with members of another cultural group. Cultural awareness education is the first building block towards cultural safety.</p> <p><i>Cultural awareness education is defined as:</i></p> <p><i>An understanding of how a person's culture may inform their values, behaviours, beliefs, and basic assumptions ... [It] recognises that we are all shaped by our cultural background, which influences how we interpret the world around us, perceive ourselves and relate to other people.</i></p> <p><i>The focus of cultural awareness education is on outcomes for the participant or learner – that is, self-reflection leading to enhanced cultural awareness. It is introductory in nature, and through increased awareness, the learner can enhance their skills in working effectively with Aboriginal and Torres Strait Islander people.</i></p> <p>[RACGP Aboriginal and Torres Strait Islander Health Faculty– Cultural awareness and safety training]</p>
Cultural understanding	Cultural understanding in practice is the action of applying cultural awareness and safety training into actions that recognise, respect, and nurture the cultural identity of a person and meets their individual needs.
Cultural safety	Cultural safety is determined by Aboriginal and Torres Strait Islander individuals, families, and communities. Culturally safe practice is the delivery of safe, accessible, and responsive healthcare free of racism through ongoing critical reflection about knowledge, skills, and attitudes, practising behaviours and power differentials.

	Cultural safety training is more in-depth than cultural awareness education and aims to result in a behavioural change. The approach to training is still highly reflective but also uses learning methodologies that result in behavioural changes and practice improvements
Cultural educator	<p>A cultural educator is an Aboriginal and Torres Strait Islander person who is formally engaged (ie employed, brokered/contracted) by a training organisation to deliver cultural education. Within the context of the AGPT program, a cultural educator will apply cultural knowledge and expertise to the design, delivery and evaluation of the education and training program. In some instances, a cultural educator will also work as a cultural mentor.</p> <p>A cultural educator must be an Aboriginal and/or Torres Strait Islander person endorsed by the local community to have a sound knowledge of the local community history including an understanding of a community's traditional and contemporary ways.</p> <p>Cultural educators generally work with medical educators to promote, develop, deliver, and evaluate cultural awareness training for registrars and other individuals and organisations.</p>
Cultural mentor	Cultural mentors support GP registrars to train in the Aboriginal and Torres Strait Islander health training environment, and to participate in activities that will enhance the registrars' cultural capabilities whilst undertaking their training in an Aboriginal and Torres Strait Islander health post. In the course of their daily work, cultural mentors might provide advice on cultural matters and other issues relevant to the needs of a training organisation, their staff, registrars, and others, and will generally work with cultural educators to deliver cultural awareness training and provide curriculum input.
Education	Education is the process of developing knowledge, skills and attitudes and includes all modes of learning, training, professional development, and assessment.
Discretionary funding	Funding that does not have a fixed assignment but is allocated to unanticipated resourcing requirements depending on level of need
Lead supervisor	The lead supervisor has a specialist GP qualification (RACGP or ACRRM) and has undergone core supervisor training including cultural safety training. The lead supervisor is responsible for coordinating a supervision team within the training site and is responsible for the registrar supervision plan, in-practice teaching plan and a supervision team professional development plan.
Learning	Learning is an experiential process that results in a change in knowledge or behaviour. This process may involve acquiring new understanding, knowledge, skills, behaviours, values, and attitudes.
Mentorship	<p>Mentorship is a mutually beneficial, non-evaluative relationship between a more experienced person (mentor) and a less experienced person (mentee) that is caring, collaborative, and respectful (Rohatinsky, Harding & Carriere, 2017). It often results in the mentor sharing information, advice, knowledge, or training to the mentee. Mentorship can be helpful to support an individual to achieve a goal, complete a project or facilitate a transition to a different role or an expanded level of responsibility (Gruber-Page, 2016)</p> <p>[NSW Health – South Eastern Sydney local health district]</p>

Progressive assessment	The assessment of registrars throughout training for the purpose of directing their education and for determining progress decisions based on the achievement of competency milestones.
RACGP local	These are the local teams comprising MEs, a TC and an administrator. The local teams will provide contextually relevant education and support to a group of registrars from entry into the program through to Fellowship. Cultural safety education is led by local cultural educators supported by the local MEs and TC and by regional Aboriginal and Torres Strait Islander teams.
RACGP national	The RACGP national team will oversee the overall program governance and coordination and provide high level educational leadership and resourcing. This is a lean central office whose primary role is to enable efficient and effective training delivery in the regions and local areas by supporting generic activities.
RACGP regional	These are regional teams which have responsibilities that parallel the more centralised activities of the RTOs. A key focus of the regional team is to support the local teams.
Training coordinator (TC)	<p>The TC is responsible for case management of a group of registrars in their local training hub, from program entry to Fellowship. The TC provides administrative support and training advice, coordinates clinical teaching visits, collates assessment results, and assists the medical education team with registrar review meetings.</p> <p>Training coordinators support practices and supervisors to achieve accreditation, provide administrative support and organise practice visits by the medical education team.</p>
Training	Training is the activity of teaching or learning of skills and knowledge required for a particular role or task. It usually requires instruction and practice to develop a particular skill to a desired standard.
Work-based learning	<p>Work-based learning is learning in the context of participating in the work of working community, in this context, a clinical service.</p> <p>According to the Department of Health:</p> <p><i>Work-based learning is the term used to describe a relationship between learning and work. It emerges from the demands of work, rather than from formal educational programs (Gore, 2001). Workplace (or on-the-job) learning is much more than a training course or a single on-the-job activity. It exists in a variety of forms (such as teamwork, coaching, mentoring and computer-based learning) . . .</i></p>

Acronyms

ACCHS	Aboriginal Community Controlled Health Service
ACRRM	Australian College of Rural and Remote Medicine
ADF	Australian Defence Force
AHPRA	Australian Health Practitioner Regulation Agency
AIDA	Australian Indigenous Doctors' Association
ALS	Advances Life Support
AMC	Australian Medical Council
AMS	Aboriginal Medical Service
AMSA	Australian Medical Students' Association
ANZAHPE	Australian & New Zealand Association for Health Professional Educators
ARST	Additional rural skills training
BAU	Business as usual
BLS	Basic Life Support
CALD	Culturally and linguistically diverse
CATSINaM	Congress of Aboriginal and Torres Strait Islander Nurses and Midwives
CBD	Case-based discussion
CE	Cultural educator
CM	Cultural mentor
CE/CM Network	Cultural Educators and Cultural Mentors National Network
CiC	Censor-in-Chief
CoP	Community of practice
CT	Clinical teaching
CTV	Clinical teaching visit
DoH	Department of Health
DOPS	Direct observation of procedural skills
DoT	Director of training

DPA	Distribution priority area
ED	Emergency department
EM	Emergency medicine
EMC	Emergency Medicine Certificate
ERU	Education Research Unit
GM	General manager
GPA	GP anaesthetist
GPiT	General practitioner in training
GPE	General practice experience
GPME	General practice medical education
GPO	GP obstetrician
GPSA	General Practice Supervisors Australia
GPSN	General Practice Students Network
GPTAC	General Practice Training Advisory Committee
IAHA	Indigenous Allied Health Australia
IGPRN	Indigenous GP Registrars Network
IHT	Indigenous health training
IMG	International medical graduate
JCC	Joint Consultative Council
JMO	Junior medical officer
LITFL	Life in the fast lane
MDO	Medical Defence Organisation
ME	Medical educator
Mini-CEX	Mini Clinical Evaluation Exercise
MMI	Multiple Mini-Interview
NAA	National assessment advisor
NACCHO	National Aboriginal Community Controlled Health Organisation

NAATSIHWP	National Association of Aboriginal and Torres Strait Islander Health Workers and Practitioners
NCL	National Clinical Lead
NFATSIH	RACGP Aboriginal and Torres Strait Islander Health Faculty
NTCER	National terms and conditions for the employment of registrars
PBS	Pharmaceutical Benefits Scheme
PEP	General Practice Experience Pathway
PGY2	Postgraduate Year 2
PHN	Primary health network
PLT	RACGP profession-led community-based training
PMC	Postgraduate medical councils
RAP	Reconciliation Action Plan
RCA	Random case analysis
REC-R	RACGP expert committee - Research
RG	Rural Generalist
RGCU	Rural generalist coordination unit
RLO	Registrar liaison officer
RME	Registrar medical educator
RPA	Recognition of prior assessment
RPG	Rural procedural grant
RPL	Recognition of prior learning
RTO	Regional training organisation
RWA	Rural workforce agency
SME	Subject matter expert
STE	Special training environment
TAG	
TCLTAC	Transition to College-Led Training Advisory Committee
TOC	

TC	Training Coordinator
ToR	Terms of reference
TRA	Targeted recruitment administrator
VT	Vocational training
WBA	Workplace-based assessment
WIP	Workforce incentive programs

Appendix 1: RACGP policies, manuals and handbooks

Policy/manual/handbook	Section
Aboriginal and Torres Strait Islander Fellowship Exam Support Policy	Training support, Aboriginal and Torres Strait Islander health cultural and health training sections
Academic Posts Policy	Training support, Academic posts
Accreditation Policy	Rural Generalist and Rural GP training, Aboriginal and Torres Strait Islander cultural and health training sections, Accreditation, Training in ADF, Risk Management, Extended skills training
Application Manual	Post-Fellowship, Eligibility and Selection, Academic posts, Aboriginal and Torres Strait Islander cultural and health training sections
Application Handbook	Selection and Eligibility, Post-Fellowship, Aboriginal and Torres Strait Islander cultural and health training sections, Supporting registrars
ARST curriculums and guidance documents	Rural Generalist and Rural GP training
Assessor Manual	Rural Generalist and Rural GP training, Aboriginal and Torres Strait Islander cultural and health training sections
Exam Eligibility Policy	Training support
Fellowship examination guidance	Training support, Aboriginal and Torres Strait Islander cultural and health training sections
Fellowship Exam Attempts Policy	Training support
GPiT Accessibility Policy	Training pipelines, Inducting registrars and planning their training, Training support, Placements
GPiT Safety and Wellbeing Policy	Training support
Guide about the GP training program relevant for AMS/ACCHOs	Aboriginal and Torres Strait Islander cultural and health training sections
Guide about the GP training program relevant for hospital staff	Hospital training terms
Leave and Extensions Policy	Supporting registrars, Community-based training, Rural generalist and rural GP training, Aboriginal and Torres Strait Islander health cultural and health training sections
Medical Educator Manual	Inducting registrars and planning their training, Aboriginal and Torres Strait Islander cultural and health training sections, Academic posts, Educational interventions, Training site support and training, Professional development for medical educators, Medical educator support
Placement Policy	Training pipelines, Placements, Aboriginal and Torres Strait Islander cultural and health training

RACGP Complaints Policy	Training support, Support and performance management of supervisors
RACGP Privacy Policy	Monitoring and evaluation
Reconsiderations and Appeals Policy	Risk management
Registrar Training Handbook	Post-Fellowship, Hospital training terms, Placements, Inducting registrars and planning their training, Rural Generalist and Rural GP training, Aboriginal and Torres Strait Islander cultural and health training sections, Training in academic general practice, Academic posts, Training in ADF, Progressive assessment, Educational interventions
GPIt at Risk and Remediation Policy	Supporting registrars, Educational interventions
Requirements for Fellowship Policy	Post-Fellowship, Training Support, Aboriginal and Torres Strait Islander cultural and health training sections, Hospital training terms, Extended skills, Educational interventions, Progressive assessment, Supporting registrars, Risk management
Recognition of Prior Learning Policy	Training pipelines, Eligibility and selection, Inducting registrars and planning their training
Selection Policy	Training pipelines, Eligibility and selection
Special Arrangements Policy	Supporting registrars, Progressive assessment
Training Implementation Manual	Post-Fellowship, Hospital training terms, Placements, Inducting registrars and planning their training, Community-based training, Rural Generalist and Rural GP training, Aboriginal and Torres Strait Islander cultural and health training sections, Academic posts, PhD pathways, Process for a registrar to complete extended skills, Training in the ADF, Training in academic general practice, Progressive assessment, Supporting registrars, Supervision, teaching and professional development plans, Professional development and evaluation for supervisors, Educational interventions, Remote supervision, Training site support and training Professional development for medical educators, Risk management, Support and performance management of supervisors, Education program governance
Training Obligations Policy	Training pipelines, Post-Fellowship, Eligibility and selection, Placements, Aboriginal and Torres Strait Islander cultural and health training sections, Progressive assessment, Supporting registrars, Educational interventions, Training in the ADF, Rural Generalist and Rural GP training
Training Regions and Transfer Policy	Training pipelines, Placements, Supporting registrars
Training Site and Supervisor Manual	Community-based training, Rural Generalist and Rural GP training, Aboriginal and Torres Strait Islander cultural and health training sections, Academic posts sections, Accreditation sections, Training in the ADF, Progressive assessment, Supporting registrars, Educational interventions, Supervisor recruitment and retention, Professional development and evaluation, Faculty development for supervisor professional development, Cultural education for supervisors and practices, Support and performance management of supervisors, Training site support and training, Risk management, Remote supervision,
Withdrawal Policy	Educational interventions, Supporting registrars
