RACGP Queensland presents: Hot Topics 2022

This single day educational workshop is a degustation for the mind, with six one-hour presentations, featuring a broad range of current and emerging topical issues important to General Practice and primary care.

“A day of short, sharp, to-the-point updates on current clinical topics”

Program:

- **Infectious diseases update – Japanese encephalitis, Monkey Pox, what’s next?**
- **Insomnia management**
- **Consultation skills**
- **Rheumatic heart disease**
- **Weight loss management options**
- **Ischemic heart disease screening and work-up**

You will have the opportunity to engage in discussion with the presenters towards the end of each topic.

The event will also include an exhibitor trade show area providing you information about key products and services for GPs and GPs in training.

A networking function in collaboration with Northern Queensland Primary Health Network (NQPHN) will immediately follow the workshop, providing you with the opportunity to mix and mingle with your colleagues, meet RACGP Queensland Faculty

representatives and our event partners and sponsors. Drinks and canapes are provided.

Sponsors and Partners

 To reduce our eco-footprint, we're now offering more opportunities to register online.

Presenters

Dr Steven Donohue - Townsville Hospital Public Health Unit Director

Dr Chris Moller - General Practitioner & Hot Topics Clinical Lead
