

2026.2 Core Vocational Training Term Educational Webinars

Training region: Western Australia

We deliver a monthly 1.5-hour webinar covering different topics, presented by internal medical educators or external presenters. The educational webinar series is a supplementary learning activity to support completion of mandatory education hours for GP training in their relevant core vocational training term level (GPT1 through to GP Extended Skills). This is particularly important for GPT2 and GPT3 registrars, who are expected to attend a portion of these webinars to meet their required education hours.

Please note that attendance to these education webinar series does not replace mandatory attendances in:

- Large group learning days/workshops
- Small group learning days
- Cultural Health and Education Training (CHET) days

To successfully count towards mandatory hours, webinars must be attended **live, in full and on time**. Logging in more than 20 minutes late, leaving early or watching webinar recordings will not be counted.

Registrar needs to inform their training site in advance of the webinars they plan to attend so clinic schedules can be adjusted. If registrar wishes to attend additional webinars after meeting their required hours, they will need to negotiate a time release with their training site.

Date	Education hours	Time	Webinar
Tuesday, 18 August	1.5	8.30 am	Viral Hepatitis
Tuesday, 15 September	1.5	8.30 am	Sexual Transmitted Infection
Tuesday, 20 October	1.5	8.30 am	Eating Disorders
