

2026 GPT1 to GP Extended Skills Educational Webinars

Training region: Western Australia

In 2026, WA will offer 15 educational webinars for all registrars. Content for the webinar series is varied, and registrars can choose which webinars they wish to attend depending on their educational needs and stage of training.

Registrar should attend the educational webinar series to **assist** in reaching the mandatory hours required for their relevant GP term levels.

Please note that attendance to these education webinar series (except orientation webinars) does not replace mandatory attendances in large group learning days, small group learning days and Cultural Health and Education Training (CHET) days as per the registrar's educational requirements.

Please contact your Training Coordinator should you have further questions or email WA.trainingsupport@racgp.org.au.
