

RACGP Placement Process 2024.1

Our aim

The RACGP placement process is designed to equitably distribute registrars across Australia in a transparent and flexible manner.

An open market approach, facilitated through the Training Management System (TMS), affords choice for both registrars and practices. Bespoke priority placement support is available where there are identified community, practice, or registrar training needs.

We recognise that the RACGP placement process may be quite different from what some training regions have experienced previously. Our local training support teams understand this and are available to help registrars and practices navigate this process.

Key Dates

Please note the following dates and mark them in your calendar for reference of the upcoming process you will each be involved in. More detailed information will follow.

Date	Activity	Period
