

The Victorian Government is developing the first Victorian Antimicrobial Resistance Strategy 2021-2031.

You can help shape the Strategy by completing the consultation survey at [Engage Victoria website](#).
The survey **closes on 7 September 2021**.

A comprehensive consultation process has been launched and invites key stakeholders and the public to provide input into the objectives and priority actions of the Victorian Antimicrobial Resistance Strategy 2021-2031.

The consultation survey enables you to provide input into the vision, objectives and priority areas of the Victorian Antimicrobial Resistance Strategy, as well as provide information about sector-specific successes and challenges in responding to Antimicrobial Resistance in Victoria.
