

AFP Reviewers 2012

Australian Family Physician uses a double-blind peer review process. Reviewers provide a critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the participation of these reviewers, *AFP* would not be able to provide quality material to its readership. The editors of *AFP* sincerely thank the following reviewers for their generous contribution.
