AFP Reviews 2015

Australian Family Physician uses a double-blind peer review process. Reviewers provide a critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the participation of these reviewers, AFP would not be able to provide high-quality material to its readership. AFP would like to thank all of our 2015 reviewers for their generous contribution to the journal. The AFP team has made a donation on their behalf to Lifeline, which provides 24-hour crisis support and suicide prevention services.
