*Register early as places  
are strictly limited.*

*NSW Mock OSCE simulated exam  
is designed as a 'finishing off' of your  
exam preparation.*

### Program outline

This workshop is for candidates who are already familiar with the exam requirements. It is designed to 'finish off' your exam preparation. By realistically replicating the exam environment, Mock OSCE provides a good feel of time and exam pressures, and helps you feel less nervous in the actual exam.

The simulated exam of eight clinical stations includes short cases, long cases and structured viva. Participants will undertake the exam rotation either singly or in pairs, thus providing participation in four cases and observing four cases. Examiners will mark participants after the exam, the QA examiners will provide feedback as a group and participants will receive individual rating sheets.

A physical examination tutorial for 1.5 hour runs in parallel with each exam rotation.
