This session will enable general practitioners to understand the need for different investigations, how to interpret the results and how those results will affect patient management.

Course outline

This session will cover:

- how to choose the correct investigation for your patient
- how to determine if investigations are necessary
- interpretation of the results from investigations
- the effect of the results of investigations on patient management.

Presenters

Dr Daniel Byrne, GP and Partner of Chandlers Hill Surgery

Dr Jennifer Cowie, Consultant Radiologist, Benson Radiology

Dr Penelope Coates, Clinical Director, Chemical Pathology, SA Pathology
