Prepare for your exam at a location that suits you

This webinar series will assist in preparation for the Key Feature Problems (KFP) component of the RACGP Fellowship exams. The aim of this series is to improve your understanding of KFP questions, learn how to interpret these and how to answer correctly. This valuable course is delivered as three online tutorials, providing you with opportunities to:

- practise KFP questions
- build knowledge and improve KFP exam techniques
- learn how to avoid common KFP exam pitfalls
- receive valuable insights and advice from experienced FRACGP examiners.

The series will be facilitated by WA Assessment Panel Chair (APC) Dr Jack Christodoulou and experienced medical educator and RACGP Examiner Dr Jenny Smith.

The series is a convenient way to optimise your KFP exam preparation and ideal for rural and remote candidates. You will be emailed your unique login details after your online registration is processed.

Completion of the Exam Support Online Modules on the KFP exam are a prerequisite for the webinar series. The modules are available on [gplearning](#).

Disclaimer: Candidates should note that RACGP WA, RACGP NSW&ACT and RACGP NT run the same webinar series. Due to the confidential nature of exam material the webinars are not recorded. Cases and questions in this series are not repeated in any other pre-exam workshop run by RACGP WA.
