

# AFP reviewers 2014

*Australian Family Physician* uses a double-blind peer review process. Reviewers provide a critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the participation of these reviewers, *AFP* would not be able to provide quality material to its readership. *AFP* would like to thank all of our 2014 reviewers for their generous contribution to the journal. The *AFP* team has made a donation on their behalf to Médecins Sans Frontières, an international, independent organisation for medical humanitarian aid.
