

AFP reviewers 2017

Australian Family Physician uses a double-blind peer review process. Reviewers provide a critical commentary on the scientific quality of material submitted for publication and its interest and relevance to general practice. This task is undertaken without reward by a large number of people in order to enhance the quality and scientific credibility of published articles. Without the participation of these reviewers, *AFP* would not be able to provide high-quality material to its readership. *AFP* would like to thank all of our 2017 reviewers for their generous contribution to the journal. The *AFP* team has made a donation on their behalf to Motor Neurone Disease (MND) Australia, an independent, not-for-profit organisation that supports MND care and research.
