

Candidate Statement – RACGP WA Faculty

Lorin Monck MBBS FRACGP

I wish to be elected as a member, and councillor of the RACGP WA Faculty.

As a previous member I have been able to contribute the pertinent current issues which are relevant to the members in Western Australia

I have been actively involved with professional clinical practice in Western Australia as a clinician, GP Supervisor and previous lecturer with Rural Clinical School

As a member based professional group I consider it important to continue to advocate for the roles of member general practitioners in being a central component of the health system in Australia. General Practice is embedded in our health system, but there are constant changes and challenges which mean that advocacy and communication with the general public remains very important

As an established rural practitioner for a number of years I consider it is very important that rural general practitioners have an important role in the WA Faculty Council as well as our more urban based colleagues
